Innovation up Close A. Michael Huberman, Matthew B. Miles, 2013-06-29 School improvement like motherhood has many advocates Everyone is for it without having to campaign actively on its behalf And just as the 100% of people who have had mothers think they know how mothering could be done better so the nearly 100% of people who have been pupils in schools or have even taught in or managed them think they know how schools can be improved More precisely they are sure that schools ought to be improved The trouble is that they propose a staggering conflicting range of methods of improving the schools from back to the woodshed to teacher merit pay a stiffer curriculum a stronger tax base reorganization a more humane climate teacher proof innovations community involvement the list is nearly endless Furthermore the issues are not merely technical but normative and political The term improvement is itself problematic One person's version of improvement is another's version of wastefulness or even of worsening the schools Furthermore the versions that win out in any particular school are not Improvement sometimes turns out to be merely a necessarily technically best code word for the directives that administrators have successfully put into place or for the agreements that teachers have lobbied into being How much do we really know about school improvement The available research literature is quite substantial but not as helpful as it might be
