Post-Colonial Trajectories in the Caribbean Rosemarijn Hoefte, Matthew L. Bishop, Peter Clegg, 2016-11-18 This book compares and contrasts the contemporary development experience of neighbouring geographically similar countries with an analogous history of exploitation but by three different European colonisers Studying the so called Three Guianas Guyana Suriname and French Guiana offers a unique opportunity to look for similarities and differences in their contemporary patterns of development particularly as they grapple with new and complex shifts in the regional hemispheric and global context Shaped decisively by their respective historical experiences Guyana in tandem with the laissez faire approach of Britain toward its Caribbean colonies was decolonised

relatively early in 1966 and has maintained a significant degree of distance from London The hold of The Hague over Suriname however endured well after independence in 1975 French Guiana by contrast was decolonised much sooner than both of its neighbours in 1946 but this was through full integration thus cementing its place within the political economy and administrative structures of France itself Traditionally isolated from the Caribbean the wider Latin American continent and from each other today a range of similar issues such as migration resource extraction infrastructure development and energy security are coming to bear on their societies and provoking deep and complex changes
