

Question 5

- (i). Electromagnets and Solenoids.
- (ii). Data Storage devices.
- (iii). Magnetic sensors and actuators.

Question 6

From :

$P = mv$, where m is the mass of the electron
 v is its speed.

We substitute for p into the de Broglie wavelength formula:

$$\lambda = \frac{h}{p}$$

$$\therefore \lambda = \frac{h}{mv}$$

Given the Kinetic energy of the electron as :

$$K.E = \frac{1}{2}mv^2$$

Therefore,

$$\text{total energy, } E = K.E + P.E$$

$$E = K.E + qV$$

Handbook of Research on the Role of Human Factors in IT Project Management Misra, Sanjay, Adewumi, Adewole, 2019-09-27. The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. The *Handbook of Research on the Role of Human Factors in IT Project Management* is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. In this book, Sonja Krause Goodwin recounts her experience joining the Peace Corps in 1964 and describes the training she underwent to teach in Nigeria at Columbia Teachers College in New York City. Goodwin tells readers about her service as a University teacher in physics while also serving as head of the Physics Department at Lagos University in Nigeria. She also describes her vacation travels during that time, mostly in Nigeria, including an attempt to climb Mt. Cameroon. She writes about her interactions with her students, her fellow University teachers, and other University employees, her fellow Peace Corps volunteers, and other expatriates and Nigerians whom she met under during her travels. Goodwin also delves into the politically motivated university crisis that led to the exodus from the university and Nigeria of almost all the expatriate teaching staff of the university, including the Peace Corps volunteers. She also discusses some of her work for the West African Examinations Council and the Aptitude Testing Unit in Lagos while waiting to be sent to another assignment for her second year in the Peace Corps. **Quality Services in Academic Libraries** Felicia Etim, 2016-06-25.

There is great consistency throughout these articles, research projects, management schemes, and standards in and out of librarianship. Does the repetition suggest that the lessons have not yet been learned? Rather, it may be that there is no new silver bullet or shortcut for academic libraries. Experience reveals that one may have the formal process without getting good results, and vice versa, the determining factor is whether the library staff, managers, and stakeholders define certain fundamental assumptions about the nature of the enterprise. All the above have in common the following underlying components: The careful definition of goals or of some kind of criteria against which success can be assessed. A focus on

meeting the needs of the users as defined by the library and the institution Leadership a commitment from the top conscious efforts at ensuring communication the provision of training and resources for the process of evaluation the active support of a process to promote shared values The involvement of all levels of staff in goal setting evaluation and the improvement of processes and services Integrating a process of evaluation that is continuous and adaptive whether that process is based on the framework of TQM strategic planning or another model
