Medeiros,2005-08-16 China s export controls on equipment materials and technologies used to produce weapons of mass destruction WMD have evolved significantly since the early 1980s This monograph examines the structure and operation of the Chinese government s system of controls on exports that could be used in the production of WMD and WMD related delivery systems The author identifies the key organizations involved in export control decisionmaking relevant laws and regulations and the interactions among government organizations involved in vetting sensitive exports **The Dragon and the Raven** G. A. Henty,2017-01-01 Living in the present days of peace and tranquillity it is difficult to picture the life of our ancestors in the days of King Alfred when the whole country was for years overrun by hordes of pagan barbarians who slaughtered plundered and destroyed at will You may gain perhaps a fair conception of the state of things if you imagine that at the time of the great mutiny the English population of India approached that of the natives and that the mutiny was everywhere triumphant The wholesale massacres and outrages which would in such a case have been inflicted upon the conquered whites could be no worse than those suffered by the Saxons at the hands of the Danes From this terrible state of subjection and suffering the Saxons were rescued by the prudence the patience the valour and wisdom of King Alfred In all subsequent ages England has produced no single man who united in himself so many great qualities as did this first of great Englishmen He was learned wise brave prudent and pious devoted to his people clement to his conquered enemies He was as great in peace as in war and yet few English boys know more than a faint outline of the events of Alfred s reign events which have exercised an influence upon the whole future of the English people School histories pass briefly over them and the incident of the burned cake is that which is of all the actions of a great and glorious reign the most prominent in boys minds In this story I have tried to supply the deficiency Fortunately in the Saxon Chronicles and in the life of King Alfred written by his friend and counsellor Asser we have a trustworthy account of the events and battles which first laid Wessex prostrate beneath the foot of the Danes and finally freed England for many years from the invaders These histories I have faithfully followed The account of the siege of Paris is taken from a very full and detailed history of that event by the Abbe D Abbon who was a witness of the scenes he described **The Dragon and the Raven (Viking Novel)** G. A. Henty,2020-12-17 The Dragon and The Raven is a tale of England before it was England back in the days when the Saxons were dealing with the raiding Vikings during the 9th century The story follows young Edmund who is forced at only fourteen years of age to become

a warrior and defend his land Edmund becomes a member of a crew on the ship called The Dragon and they bravely fight several battles with Vikings with Edmund going through numerous perilous adventures in the process of fighting the Norsemen off including being captured and having an odd romance with the daughter of the enemy

Encyclopedia of the Sciences of Learning Norbert M. Seel, 2011-10-05

Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation, cognition, metacognition, etc. and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naive theories of learning, psychological learning theories can be grouped into some basic categories such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories, and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology, education, information science, biology, and as a result of the emergence of computer technologies, especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other as a consequence; even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The Encyclopedia of the Sciences of Learning provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of instruction, pedagogy, cognitive sciences, and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers, and technical staff active in all fields of learning. More specifically, the Encyclopedia provides fast access to the most relevant theoretical terms, provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences, and communication technologies, supplies clear and precise explanations of the theoretical terms, cross-references to related entries, and up-to-date references to important research and publications. The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences.
