Learning to Love the Bomb Sean M. Maloney, 2007 In *Learning to Love the Bomb* Sean M Maloney explores the controversial subject of Canada's acquisition of nuclear weapons during the Cold War Based on newly declassified Canadian and U S documents it examines policy strategy operational and technical matters and weaves these seemingly disparate elements into a compelling story that finally unlocks several Cold War mysteries For example while U S military forces during the 1962 Cuban Missile Crisis were focused on the Caribbean Sea and the southeastern United States Canadian forces assumed responsibility for defending the northern United States with aircraft armed with nuclear depth charges flying patrols and guarding against missile attack by Soviet submarines This defensive strategy was a closely guarded secret because it conflicted with Canada's image as a peacekeeper and therefore a more passive member of NATO than its ally to the south It is revealed here for the first time The place of nuclear weapons in Canadian history has until now been a highly secret and misunderstood field subject to rumor rhetoric half truths and propaganda *Learning to Love the Bomb* reveals the truth about Canada's role as a nuclear power
