Copyright Office,1946 **The Classification of Quadrilaterals** Zalman Usiskin,2008-01-01 This monograph reports on an analysis of a small part of the mathematics curriculum the definitions given to quadrilaterals This kind of research which we call micro curricular analysis is often undertaken by those who create curriculum but it is not usually done systematically and it is rarely published Many terms in mathematics education can be found to have different definitions in mathematics books Among these are natural number parallel lines and congruent triangles trapezoid and isosceles trapezoid the formal definitions of the trigonometric functions and absolute value and implicit definitions of the arithmetic operations addition subtraction multiplication and division Yet many teachers and students do not realize there is a choice of definitions for mathematical terms And even those who realize there is a choice may not know who decides which definition of any mathematical term is better and under what criteria Finally rarely are the mathematical implications of various choices discussed As a result many students misuse and otherwise do not understand the role of definition in mathematics We have chosen in this monograph to examine a bit of mathematics for its definitions the quadrilaterals We do so because there is some disagreement in the definitions and consequently in the ways in which quadrilaterals are classified

and relate to each other The issues underlying these differences have engaged students teachers mathematics educators and mathematicians There have been several articles and a number of essays on the definitions and classification of quadrilaterals But primarily we chose this specific area of definition in mathematics because it demonstrates how broad mathematical issues revolving around definitions become reflected in curricular materials While we were undertaking this research we found that the area of quadrilaterals supplied grist for broader and richer discussions than we had first anticipated The intended audience includes curriculum developers researchers teachers teacher trainers and anyone interested in language and its use
