Prescribing under Pressure Tanya Stivers, 2007-03-01 Antibiotics will soon no longer be able to cure common illnesses such as strep throat sinusitis and middle ear infections as they have done for the last 60 years Antibiotic resistant bacteria are increasing at a much faster rate than new antibiotics to treat them are being developed The prescription of antibiotics for viral illnesses is a key cause of increasing bacterial resistance Despite this fact many children continue to receive antibiotics unnecessarily for the treatment of viral upper respiratory tract infections Why do American physicians continue to prescribe inappropriately given the high social stakes of this action The answer appears to lie in the fundamentally social nature of medical practice physicians do not prescribe as the result of a clinical algorithm but prescribe in the context of a conversation with a parent and a child Thus physicians have a classic social dilemma which pits individual parents and children against a greater social good This book examines parent physician conversations in detail showing how parents put pressure on doctors in largely covert ways for instance in specific communication practices for explaining why they have brought their child to the doctor or answering a history taking question This book also shows how physicians yield to this seemingly subtle pressure evidencing that apparently small differences in wording have important consequences for diagnosis and treatment recommendations Following parents use of these interactional practices physicians are more likely to make concessions alter their diagnosis or alter their treatment recommendation This book also shows how small changes in the way physicians present their findings and recommendations can decrease parent pressure for antibiotics This book carefully documents the important and observable link between micro social interaction and macro public health domains

The Social and Political Thought of R. G. Collingwood David Boucher, 2003-11-13 This is the first comprehensive study of the political philosophy of the British philosopher R G Collingwood best known for his contributions to aesthetics and the philosophy of history However his political thought and in particular his book *The New Leviathan* have been neglected even dismissed in some quarters Professor Boucher argues for the importance of this political theory and provides a perspicuous account of its development and originality He contends that *The New Leviathan* is an attempt to reconcile philosophy and history theory and practice Collingwood's distinctive contribution to modern political and social thought is seen as his sustained project of distinguishing utility from right and right from duty the passion for history coincides with the ethical thought because Collingwood wishes to identify dutiful or moral action with a historical civilization Drawing on a wealth of manuscript material this book will prove invaluable to political philosophers and intellectual historians
