Assessment of the Scientific Information for the Radiation Exposure Screening and Education Program

National Research Council, Division on Earth and Life Studies, Board on Radiation Effects Research, Committee to Assess the Scientific Information for the Radiation Exposure Screening and Education Program, 2005-10-01 The Radiation Exposure Compensation Act RECA was set up by Congress in 1990 to compensate people who have been diagnosed with specified cancers and chronic diseases that could have resulted from exposure to nuclear weapons tests at various U S test sites Eligible claimants include civilian onsite participants downwinders who lived in areas currently designated by RECA and uranium workers and ore transporters who meet specified residence or exposure criteria The Health Resources and Services Administration HRSA which oversees the screening education and referral services program for RECA populations asked the National Academies to review its program and assess whether new scientific information could be used to improve its program and determine if additional populations or geographic areas should be covered under RECA The report recommends Congress should establish a new science based process using a method called probability of causation assigned share PC AS to determine eligibility for compensation Because fallout may have been higher for people outside RECA designated areas the new PC AS process should apply to all residents of the continental US Alaska Hawaii and overseas US territories who have been diagnosed with specific RECA compensable diseases and who may have been exposed even in utero to radiation from U S nuclear weapons testing fallout However because the risks of radiation induced disease are generally low at the exposure levels of concern in RECA populations in most cases it is unlikely that exposure to radioactive fallout was a substantial contributing cause of cancer

,1973 **Journal** ,1914 Nuked Linda C. Morice,2022-12-01 Nuked recounts the long term effects of radiological exposure in St Louis Missouri the city that refined uranium for the first self sustaining nuclear reaction and the first atomic bomb As part of the top secret Manhattan Project during World War II the refining created an enormous amount of radioactive waste that increased as more nuclear weapons were produced and stockpiled for the Cold War Unfortunately government officials deposited the waste on open land next to the municipal airport An adjacent creek transported radionuclides downstream to the Missouri River thereby contaminating St Louis s northern suburbs Amid official assurances of safety residents were unaware of the risks The resulting public health crisis continues today with cleanup operations expected to last through the year 2038 Morice attributes the crisis to several factors They include a minimal concern for land pollution cutting corners to win the war new homebuilding practices that spread radioactive dirt insufficient reporting mechanisms for cancer and a fragmented government that failed to respond to regional problems Risk Analysis John J. Cohrssen,Vincent T. Covello,1999-05 Designed for consumers of risk information this book offers a balance between the technical and nontechnical literature The discipline of risk analysis has developed into an organized body of knowledge and methods only within the past 20 years The passage of federal laws to protect public health and the environment has generated rapid growth in risk analysis in numerous fields Statements of risk need to be understood to be useful to the public and environmental managers This guidebook provides a tool for understanding risk analysis Chapters overview of risk analysis hazard identification risk assessment and risk communication **Journal of the Missouri State Medical Association** ,1913 *Resources in Education* ,1973 **Federal Register** ,2004 **The International Control of Atomic Energy, Scientific Information Transmitted to the United Nations Atomic Energy Commission** United Nations.
