It provides a comprehensive review of topics students need to know for these exams including coverage of anatomy, medical terminology, pathophysiology, as well as concepts, guidelines, and rules of medical coding. Authors Cynthia Stewart and Cynthia Ward bring a fresh approach to exam prep based on their teaching experience and helping students prepare for certification exams. They provide the necessary tools to understand how to break each case down and translate services, procedures, and diagnoses into the most appropriate codes for reimbursement.

Newman's Billing and Coding Specialist Study Guide Xavier Newman, Xavier R S Newman Nrcs, 2012-01-01. Medical coding professionals provide a key step in the medical billing process. Every time a patient receives professional health care in a physician's office, hospital, outpatient facility, or ambulatory surgical center (ASC), the provider must document the services provided. The medical coder will abstract the information from the documentation, assign the appropriate codes, and create a claim to be paid, whether by a commercial payer, the patient, or CMS. While the medical coder and medical biller may be the same person or may work closely together to make sure all invoices are paid properly, the medical coder is primarily responsible for abstracting and assigning the appropriate coding on the claims. In order to accomplish this, the coder checks a variety of sources within the patient's medical record, i.e., the transcription of the doctor's notes, ordered laboratory tests, requested imaging studies, and other sources to verify the work that was done. Then the coder must assign CPT codes, ICD-9 codes, and HCPCS codes to both report the procedures that were performed and to provide the medical biller with the information necessary to process a claim for reimbursement by the appropriate insurance agency. This text is intended to dispel any ambiguity prior to taking your national certification. This text contains over 400 preparatory examination questions covering ICD-9, ICD-10, Revenue cycle, Medical report extrapolation, assignments, HCPCS, UB04, and CPT.
