*Visual Diagnosis and Care of the Patient with Special Needs* Taub, Mary Bartuccio, Dominick M. Maino, 2012 *Visual Diagnosis and Care of the Patient with Special Needs* provides a thorough review of the eye and vision care needs of patients with special needs. This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office. These disabilities include patients with autism, brain injury, Fragile X syndrome, and Down syndrome, as well as those with psychiatric illness, dual diagnosis, and more. The text discusses in great detail the visual issues inherent in these populations and their possible treatment. A group of authors with approximately 500 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference. It may appear that this book is written primarily for eye care practitioners such as optometrists and ophthalmologists, while vision is the overriding topic, this book serves as an excellent resource for a multitude of professions including those engaged in occupational therapy, physical therapy, speech and language therapy, psychiatry, social work, pediatric medicine, and special education. Tatiana A. Kaminsky and Janet M. Powell's 60-plus years combined of clinical teaching and research experience in adult neuro-based rehabilitation. This best-selling text translates the available research and theory into application for practice. The result is a comprehensive, accessible, up-to-date, and evidence-informed textbook with a strong occupation-based focus detailing occupational therapy evaluation and treatment practices for adults with visual perceptual and cognitive deficits after brain injury. What's new in the Fifth Edition? An emphasis on functional cognition, occupational focus, and changes in approaches to rehabilitation. Clinical examples from adult neurorehabilitation to ease understanding. Up-to-date evidence and everyday technology implementation. Tips for collaborating with a team of practitioners. New case examples. Included with the text are online supplemental materials for faculty use in the classroom.
