transactional way individuals give something in return for getting something from authorities who label them as gifted the labeling authority then expects those individuals identified as gifted to act in ways that justify the label The authors place emphasis on transformational giftedness giftedness that serves to make the world a better place This Element stresses the importance of intelligence not of the kind of narrow intelligence measured by IQ tests and their proxies but rather the kind of broad intelligence used to adapt to a variety of real world environments The authors further discuss the nature of dual exceptionality whereby individuals may be identified as having a disability yet at the same time act in gifted ways and thereby harbor the potential to contribute to the world in some distinguished fashion *History of the United States* Lorna C.
