Rethinking Literary Naturalism Ian James, 2025-04-16 This book gives original readings of Proust and Quignard to elaborate a novel theory of literary naturalism Drawing on contemporary biological perspectives the book argues that despite their opposition to traditional naturalism both understand human experience meaning making and creativity as being immanent to and as emerging from shared biological life Rethinking Literary Naturalism reads contemporary biosemiotic theory Proust and Quignard alongside each other in the context of a shared genealogy that leads back into nineteenth century philosophical and literary visions of natural life that are inherited from German Romanticism and Idealism Here biological theory and forms of literary practice are recast as distinct techniques of thought that aim to situate themselves in relation to biological life Each in its own way is shown to adopt an interpretative posture that steps back into the immanence of sense and meaning that is constitutive of qualitatively lived existence Each produces a different kind of knowledge scientific literary literary philosophical of shared biological life that can be understood as distinctive variations of a saying after life The novel literary naturalism that is rethought here can be understood as post dicative and as being entirely distinct from that of mile Zola Maupassant or the Goncourt brothers

**General Pedagogy** Martha M. A. Zama, Margaret Nalova Endeley, 2023-02-24 General Pedagogy A Guide to Effective Teaching demystifies the scientific art of teaching by providing facts principles and concrete examples in real life situations such that neither the novice teacher who peruses it will stutter in front of students on the first day of school nor will the experienced teacher write and execute the same old lesson plans on that day The best teachers are those who show you where to look but don t tell you what to see is a popular quote attributed to Alexandra K Trenfor which aptly summarises the kind of teachers this book intends to produce when used as a teacher training resource Real teachers facilitate learning they do not simply tell learners the answers to their questions and concerns Accordingly the authors take the readers through well researched themes in the academic discipline of teaching wherein they present analyse and discuss pertinent issues Although they provide useful suggestions for teaching success the authors encourage teachers to interpret facts ideas and suggestions presented against the sociocultural contexts of their practice The materials are presented creatively while adding a personal touch intended to facilitate effective and efficient learning For coherence and better comprehension the book has been carefully crafted in eighteen chapters lodged in six parts The first part introduces the reader to the concepts of teaching and teaching effectiveness The theoretical underpinnings of these concepts are brought out in the second part which paves the way for the third part that describes generic teaching approaches strategies and methods Part four and five comprise essential teaching skills and teaching tools for the 21st century while part six wraps up with the transition from teacher training laboratories to classrooms in the real world The last two chapters intentionally prepare the teacher to overcome challenges of professional work in contemporary African classrooms

**Aristotle on Meaning in the Living World** Peter N. Jackson, 2025-11-28 This book provides an examination of Aristotle's relevance to modern philosophy and science It presents Aristotle's corpus as a complex and comprehensive picturing of a sublunary world in which meaning is exhibited by and shared between beings *ousiai* This approach is mirrored in modern philosophy by phenomenology and in modern science by biosemiotics Peter N Jackson argues however that Aristotle overcomes the slippery subjectivism residually found even in these sympathetic modern approaches meaning is not just how living beings perceive the world but is an inherent property of the world itself and the beings it contains From this perspective our vision of the world is itself incomplete and superficial if it does not recognise the ontological structures that give definition to that world or the principle of complementarity through which we can engage with the complex reality of that world By contrast reductionism claims to achieve a complete picture of the world but does so only by conflating philosophy which needs to see the whole with science which needs to focus upon the part and which takes from philosophy only what it needs to do so The price of this claimed completion is profound it is the flattening of being and the annihilation of life itself and the milieu of meaning in which it exists This volume appeals to undergraduate and graduate students as well as researchers and helps us understand the world through science mathematics philosophy and religion without conflating or reducing these perspectives into one

**Hume's Dialogues Concerning Natural Religion** Kenneth Williford, 2023-10-31 Explores and assesses Hume's Dialogues on Natural Religion from many angles history of philosophy religion science and epistemology Most books focus only on religion Outstanding line up of contributors including Simon Blackburn and other world leading philosophers and scholars of Hume Ken Williford's

introduction does an excellent job of placing the Dialogues in context      **Biological Identity** Anne Sophie Meincke, John Dupré, 2020-08-25 Analytic metaphysics has recently discovered biology as a means of grounding metaphysical theories This has resulted in long standing metaphysical puzzles such as the problems of personal identity and material constitution being increasingly addressed by appeal to a biological understanding of identity This development within metaphysics is in significant tension with the growing tendency amongst philosophers of biology to regard biological identity as a deep puzzle in its own right especially following recent advances in our understanding of symbiosis the evolution of multi cellular organisms and the inherently dynamical character of living systems Moreover and building on these biological insights the broadly substance ontological framework of metaphysical theories of biological identity appears problematic to a growing number of philosophers of biology who invoke process ontology instead This volume addresses this tension exploring to what extent it can be dissolved For this purpose the volume presents the first selection of essays exclusively focused on biological identity and written by experts in metaphysics the philosophy of biology and biology The resulting cross disciplinary dialogue paves the way for a convincing account of biological identity that is both metaphysically constructive and scientifically informed and will be of interest to metaphysicians philosophers of biology and theoretical biologists
