Digital Content Creation Rae Earnshaw,John Vince,2012-12-06 The very word digital has acquired a status

that far exceeds its humble dictionary definition Even the prefix digital when associated with familiar sectors such as radio television photography and telecommunications has reinvented these industries and provided a unique opportunity to refresh them with new start up companies equipment personnel training and working practices all of which are vital to modern national and international economies The last century was a period in which new media stimulated new job opportunities and in many cases created totally new sectors video competed with film CDs transformed LPs and computer graphics threatened traditional graphic design sectors Today even the need for a physical medium is in question The virtual digital domain allows the capture processing transmission storage retrieval and display of text images audio and animation without familiar materials such as paper celluloid magnetic tape and plastic But moving from these media to the digital domain introduces all sorts of problems such as the conversion of analog archives multimedia databases content based retrieval and the design of new content that exploits the benefits offered by digital systems It is this issue of digital content creation that we address in this book Authors from around the world were invited to comment on different aspects of digital content creation and their contributions form the 23 chapters of this volume
