A Formula One circuit is split into three parts called sectors. The time it takes each driver to complete each sector is recorded.

The table below shows the fastest sector times for Ferrari drivers Charles Leclerc and Carlos Sainz in the qualifying session for the 2022 Bahrain Grand Prix.

1. Complete the final column of the table by calculating the average speed of both drivers in each sector. Use the equation:

$$\text{average speed (m/s)} = \text{distance travelled (m)} \div \text{time taken (s)}$$

Write the values to four significant figures.

Driver	Sector	Sector Length (m)	Sector Time (s)	Average Speed (m/s)
Charles Leclerc	1	1725	29.12	59.24
	2	2334	38.70	60.31
	3	1353	22.71	59.58
Carlos Sainz	1	1725	29.04	59.40
	2	2334	38.84	60.09
	3	1353	22.71	59.58

At the start of their qualifying lap, both drivers were stationary.

2. What was their speed at this point?
Tick **one** box only.

The Science of Musical Sound William Ralph Bennett Jr., 2018-09-04 This textbook is a product of William Bennett's work in developing and teaching a course on the physics of music at Yale University to a diverse audience of musicians and science students in the same class. The book is a culmination of over a decade of teaching the course and weaves together historical descriptions of the physical phenomena with the author's clear interpretations of the most important aspects of the science of music and musical instruments. Many of the historical examples are not found in any other textbook available on the market. As the co-inventor of the Helium Neon laser, Prof. Bennett's knowledge of physics was world-class. As a professor at one of the most prestigious liberal arts universities in the world, his appreciation for culture and humanities shines through. The book covers the basics of oscillations, waves, and the analysis techniques necessary for understanding how musical instruments work. All types of stringed instruments, pipe organs, and the human voice are covered in this volume. A second volume covers the remaining families of musical instruments as well as selected other topics. Readers without a background in acoustics will enjoy learning the physics of the Science of Musical Sound from a preeminent scientist of the 20th century. Those well-versed in acoustics will discover wonderful illustrations and photographs depicting familiar concepts in new and enlightening ways.

Principles of Physics David Halliday, Jearl Walker, Robert Resnick, 2023 Renowned for its interactive focus on conceptual understanding, Halliday and Resnick's *Principles of Physics* 12th edition is an industry-leading resource in physics teaching with expansive, insightful, and accessible treatments of a wide variety of subjects.
