CHAPTER 3 EXERCISES

For the exercises in this chapter, you will use the GSS dataset (file name: gss.dta).

1. (Dataset: GSS. Variables: polviews, wtss.) The GSS dataset contains polviews, which measures political ideology—the extent to which individuals “think of themselves as liberal or conservative.” Here is how polviews is coded (the labels are fully written out):

Numeric Code	Value Label
1	Extremely liberal
2	Liberal
3	Slightly liberal
4	Moderate
5	Slightly conservative
6	Conservative
7	Extremely conservative

- A. Apply the **Analyze ► Descriptive Statistics ► Frequencies** procedure to polviews, making sure to weight the data using the wtss variable. Eyeball the percent column and make some rough-and-ready estimates.

The percentage of respondents who are either “extremely liberal,” “liberal,” or “slightly liberal” is (circle one)

about 18 percent. about 28 percent.
 about 38 percent.

The percentage of respondents who are either “slightly conservative,” “conservative,” or “extremely conservative” is (circle one)

about 10 percent. about 20 percent.
 about 30 percent.

- B. Use polviews and the **Transform ► Recode into Different Variables** procedure to create a new variable named polview3. Give polview3 this label: “Ideology: 3 categories.” Collapse the three liberal codes into one category (coded 1 on polview3), put the moderates

into their own category (coded 2 on polview3), and collapse the three conservative codes into one category (coded 3 on polview3). Don’t forget to recode missing values on polviews into missing values on polview3. Run **Frequencies** on polview3.

The percentage of respondents who are coded 1 on polview3 is (fill in the blank) _____ percent.

The percentage of respondents who are coded 2 on polview3 is (fill in the blank) _____ percent.

Make sure that the two percentages you wrote down in part B match the percentages you recorded in part A. The numbers may be slightly different and may still be considered a match. If the two sets of numbers match, proceed to part C. If they do not match, you performed the recode incorrectly. Review this chapter’s discussion of the Recode procedure and try the recode again.

- C. In the Variable View of the Data Editor, change Decimals to 0, and then click in the Values cell and supply the appropriate labels for the numeric codes of the new polview3 variable: “Liberal” for code 1, “Moderate” for code 2, and “Conservative” for code 3. Run the **Analyze ► Descriptive Statistics ► Frequencies** procedure on polview3. Use your results to fill in the table below.

Ideology: Three Categories	Frequency ^a	Percent	Cumulative Percent
Liberal	?	?	?
Moderate	?	?	?
Conservative	?	?	100.00%
Total	?	100.00%	

^aRound weighted frequencies to two decimal places.

2. (Dataset: GSS. Variables: colmslm, libmslm, spmslm, wtss.) The GSS dataset contains three variables that gauge tolerance toward “anti-American Muslim clergymen”—whether they should be allowed to teach in college (colmslm), whether their books should be removed from the library (libmslm), and whether they should be allowed

Throughout Galderisi looks at problems through a lens of observations and expectations which can be applied to myriad statistical techniques both descriptive and inferential This approach links the answers researchers get from their individual data analysis to the research designs and questions from which these analyses are derived By emphasizing the underlying logic of statistical analysis for greater understanding and drawing on applications and examples from political science including law the book illustrates how students can apply statistical concepts and techniques in their own research in future coursework and simply as an informed consumer of numbers in public discourse The following features help students master the material Legal and Methodological sidebars highlight key concepts and provide applied examples on law politics and methodology End of chapter exercises allow students to test their mastery of the basic concepts and techniques along the way A Sample Solutions Guide provides worked out answers for odd numbered exercises with all answers available in the Instructor's Manual Key Terms are helpfully called out in both Marginal Definitions and a Glossary A Companion Website www.routledge.com/cw/galderisi with further resources for both students and instructors A diverse array of data sets include subsets of the ANES and Eurobarometer surveys CCES US Congressional district data and a cross national dataset with political economic and demographic variables and Companion guides to SPSS and Stata walk students through the procedures for analysis and provide exercises that go hand in hand with online data sets
