The Multilingual Turn Stephen May, 2013-07-24 Drawing on the latest developments in bilingual and multilingual research The Multilingual Turn offers a critique of and alternative to still dominant monolingual theories pedagogies and practices in SLA TESOL and bilingual education Critics of the monolingual bias argue that notions such as the idealized native speaker and related concepts of interlanguage language competence and fossilization have framed these fields inextricably in relation to monolingual speaker norms In contrast these critics advocate an approach that emphasizes the multiple competencies of bi multilingual learners as the basis for successful language teaching and learning This volume takes a big step forward in re situating the issue of multilingualism more centrally in applied linguistics and in so doing making more permeable its key sub disciplinary boundaries particularly those between SLA TESOL and bilingual education It addresses this issue head on bringing together key international scholars in SLA TESOL and bilingual education to explore from cutting edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory pedagogy and practice in each of these fields **The Social Construction of Age** Patricia Andrew, 2012-01-11 This book explores the social construction of age in the context of EFL in Mexico It is the first book to address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it investigates how adults of different ages experience learning a new language and how they enact their age identities as language learners By approaching the topic from a social constructionist perspective and in light of recent work in sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender ethnicity and social class **Official U.S.**
