The Practice of Enterprise Modeling Paul Johannesson, John Krogstie, Andreas L. Opdahl, 2011-10-13 This volume constitutes the proceedings of the 4th IFIP WG 8.1 Working Conference on the Practice of Enterprise Modeling held in Oslo Norway during November 2-3 2011. The conference series is a dedicated forum where the use of enterprise modeling EM in practice is addressed by bringing together researchers, users and practitioners in order to develop a better understanding of the practice of EM to contribute to improved industrial EM applications and to share knowledge and experiences. The 18 papers presented were carefully reviewed and selected from 38 submissions. Authored by both researchers and practitioners, they reflect the fact that EM encompasses human organizational issues as well as technical aspects related to the development of information systems. The papers are organized in five thematic sessions on process modeling, business modeling, enterprise architecture, EM and model driven development. In addition, two keynotes on EM in an agile world and on intra and inter organizational process mining complete the volume. *The Commercial Litigator's Job* Cristen Sikes Rose, 2005. *The Commercial Litigator's Job: A Survival Guide* provides helpful tips and instruction on the assignments that litigators are likely to receive in the commercial litigation department of most law firms. This book is not a summary of the law but rather a recipe book for turning out legal work that satisfies the palates of the senior lawyers who give you your work and write your reviews. Book jacket. *Customer Service* Allan Woods, Lesley Hebron, Sally Bradley, 2001. This text takes candidates through the NVQ award unit by unit, offering plenty of questions and exercises to reinforce knowledge and understanding. Scenario based activities allow candidates to analyze and discuss customer service situations and practise their skills. **FCS Marketing Communication L4**, 2011. **An Intelligent Customer Complaint Management System with Application to the Transport and Logistics Industry** Alireza Faed, 2013-06-12. This thesis addresses the issue of customer complaints in the context of Customer Relationship Management (CRM). After a comprehensive survey of the current literature on CRM, the thesis describes the development of a new intelligent CRM framework which integrates text analytics, type mapping, SPSS structural equation modeling and linear and fuzzy approaches. This new methodology, in contrast to previous ones, is able to handle customer complaints with respect to different variables, thus allowing organizations to find their key customers and key complaints and to address and provide solutions to the major complaints of the key customers, hence promoting business development. The thesis also describes the successful application of the method to a real world case represented by the immeasurable truck drivers' complaints at the Fremantle port in Western Australia.
