Tactical Inclusion Jeremiah Favara, 2024-04-09 The revolution in military recruitment advertising to people of color and women played an essential role in making the US military one of the most diverse institutions in the United States Starting at the dawn of the all volunteer era Jeremiah Favara illuminates the challenges at the heart of military inclusion by analyzing recruitment ads published in three commercial magazines Sports Illustrated Cosmopolitan and Ebony Favara draws on Black feminism critical race theory and queer of color critique to reveal how the military and advertisers affected change by deploying a set of strategies and practices called tactical inclusion As Favara shows tactical inclusion used representations of servicemembers in the new military to connect with people susceptible to recruiting efforts and rendered these new audiences vulnerable to valuable to and subject to state violence Compelling and eye opening *Tactical Inclusion* combines original analysis with personal experience to chart advertising s role in building the all volunteer military Public No More Andrew J. Policano, Gary C. Fethke, 2012-05-23 *Public No More* examines the quickly changing environment within higher education including the permanent decline in state support for public universities This book raises the question of how research universities can survive with reduced subsidies and increased competition from both non profit and growing for profit institutions Authors Gary C Fethke and Andrew J Policano both longtime university administrators offer a strategic framework for determining how tuition and access should be set and how universities should decide on quality and program scope Throughout the text real world examples illustrate successful and unsuccessful adoptions of the authors proposals Leadership within public higher education policymakers and researchers alike will find *Public No More* to be a sober and well grounded guide to what lies ahead for universities across the nation Transforming Distressed Global Communities Fritz Wagner, Riad Mahayni, Andreas Piller, 2016-03-09 Many of our global cities are distressed and facing a host of issues economic collapse in the face of rising expectations social disintegration and civil unrest and ecological degradation and the threats associated with climate change including more frequent and more severe natural disasters Our long held assumptions about man and nature and how they interact are defunct We realize now that we can no longer continue to build without addressing the long term impacts of our actions and their spillovers Energy and natural resources are finite The way we configure economies has come into question In the developed world especially in the United States infrastructure and the notions that underpin it are outdated Meanwhile the developing world is experiencing major rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements Cities are the key to our future they represent the most effective vehicle for positive advancements in the human condition and environmental change This volume argues for the need to redesign and re plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi dimensionality Presenting a range of case studies from around the world this volume examines how these distressed cities are dealing with these issues in planning for their future Alongside

these empirical chapters are philosophical essays that consider the future of distressed cities Bringing together a team of leading scholars United Nations agencies non governmental organizations private consulting firms international organizations and foundations and policy officials this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places Journalism Education, Training and Employment Bob Franklin,Donica Mensing,2010-12-14 This edited volume of studies by respected international scholars describes the diverse issues journalism educators are grappling with and the changes they are making in purpose and practice Framed Sanford Levinson,2012-04-03 In his widely acclaimed volume Our Undemocratic Constitution Sanford Levinson boldly argued that our Constitution should not be treated with sanctimonious reverence but as a badly flawed document deserving revision Now Levinson takes us deeper asking what were the original assumptions underlying our institutions and whether we accept those assumptions 225 years later In Framed Levinson challenges our belief that the most important features of our constitutions concern what rights they protect Instead he focuses on the fundamental procedures of governance such as congressional bicameralism the selection of the President by the electoral college or the dimensions of the President s veto power not to mention the near impossibility of amending the United States Constitution These seemingly settled and hardwired structures contribute to the now almost universally recognized dysfunctionality of American politics Levinson argues that we should stop treating the United States Constitution as uniquely exemplifying the American constitutional tradition We should be aware of the 50 state constitutions often interestingly different and perhaps better than the national model Many states have updated their constitutions by frequent amendment or by complete replacement via state constitutional conventions California s ungovernable condition has prompted serious calls for a constitutional convention This constant churn indicates that basic law often reaches the point where it fails and becomes obsolete Given the experience of so many states he writes surely it is reasonable to believe that the U S Constitution merits its own updating Whether we are concerned about making America more genuinely democratic or only about creating a system of government that can more effectively respond to contemporary challenges we must confront the ways our constitutions especially the United States Constitution must be changed in fundamental ways Expose, Oppose, Propose William K. Carroll,2016-07-15 Neoliberal capitalism positions us all as consumers in a hypermarket where money talks For the majority of people around the globe this translates as precarity and immiseration But how can we break from this dominant ideological framework Expose Oppose Propose details how since the mid 1970s transnational alternative policy groups TAPGs have functioned as think tanks of a different sort generating resources for a globalization from below in dialogue with the critical social movements that are protagonists for global justice Based on two years of intensive research William Carroll not only provides a detailed examination of a variety of TAPGs showing how each group is distinctive and autonomous in its vision practical priorities and ways of producing and mobilizing alternative knowledge but also reveals how TAPGs form a master frame that advocates and envisages global justice and

ecological wellbeing **Leveraging** David M. Anderson, 2014-06-04 This book considers the current domestic and global political and economic landscape and will show that there are three different but related kinds of leverage that together have emerged as the dominant strategy in economics politics and international relations The economic crisis of 2008 09 was called by most economists a crisis of over leverage Yet no one has argued that there has also been a leverage crisis or at least a leverage challenge in other aspects of life The This book argues that there is a leverage mean in between the extremes of too little leverage and too much leverage that provides the basis for resolving the various crises and challenges This book which grows out of a Brookings Institution paper The Age of Leverage will analyze bargaining leverage resource leverage and economic investment leverage and should draw the attention of students and teachers in political and economic philosophy

Democracy in Theory and Practice Stephen Elstub, 2013-09-13 Democracy is an issue of major importance in theory and practice in politics throughout the world However democracy s study and advancement has been significantly compromised by a dichotomy between theorising about democracy and empirical studies of democracy in practice In addition to highlighting the need for this gap to be overcome this book contributes to overcoming this divide by demonstrating a number of ways that democracy in theory and practice can be synthesised deepening our understanding of the relationship between democracy in theory and practice in the process Different but related democratic principles and concepts are considered such as legitimacy political equality deliberation and participation A range of practical contexts are also investigated including multi level polities deeply divided societies whole polities local rural and urban areas and a range of democratic processes innovations and spectacular events Moreover the book sets the agenda for future work to combine democracy in theory and practice This book was originally published as a special issue of Representation **Israeli**
