Know Your Lawn Mower

Figure 4-1

Blade Control Handle

The blade control handle is located on the upper handle of the mower. See Figure 4-1. The blade control handle must be depressed in order to operate the unit. Release the blade control handle to stop the engine and blade.

Drive Control Handle

The drive control handle is located on the upper handle. Squeeze the drive control handle against the upper handle to engage drive system. Release the control handle to disengage the drive system in order to stop, slow down, or backup.

Mulching Plug (optional)

The mulching plug is used to close the side-discharge chute-opening when mulching or bagging grass. Do not remove the hinged mulching plug at any time, even when you are not mulching.

Recoil Starter

The recoil starter is attached to the right upper handle. Stand behind the unit and pull the recoil starter rope to start the unit.

Cutting Height Adjustment Levers

One adjustment lever is located on each wheel and is used to adjust the cutting height. All four levers have to be at the same relative position to ensure uniform cut.

Before Starting

1. Service the engine with gasoline and oil as instructed in the separate engine manual.
2. Attach spark plug wire to spark plug. If unit is

equipped with a rubber boot over the end of the spark plug wire, make certain the metal loop on the end of the spark plug wire (inside the rubber boot) is fastened securely over the metal tip on the spark plug.

Starting Engine

Briggs & Stratton/Tecumseh Engine:

1. If your unit is equipped with a primer, prime engine as instructed in the separate engine manual packed with your unit.
2. Standing behind the unit, depress the blade control handle and hold it against the upper handle as shown in Figure 4-2.
3. Grasp the starter handle as shown and pull slowly until resistance is felt, then pull rapidly to start engine and avoid kickback. Return it slowly to the rope guide.

Honda Engine

Refer to the separate engine manual packed with your unit.

1. Place the fuel valve lever found on the left side of the engine into the ON (OPEN) position, Figure 4-3.
2. Move the choke lever all the way backward into the choke position.
3. Standing behind the mower, squeeze the blade control against upper handle, Figure 4-3. The choke will now begin to slowly return to the off choke position after activating the blade control. Therefore, quickly move onto step four.
