Material-Integrated Intelligent Systems Stefan Bosse, Dirk Lehmhus, Walter Lang, Matthias Busse, 2018-03-12. Combining different perspectives from materials science, engineering and computer science, this reference provides a unified view of the various aspects necessary for the successful realization of intelligent systems. The editors and authors are from academia and research institutions with close ties to industry and are thus able to offer first-hand information here. They adopt a unique three-tiered approach such that readers can gain basic, intermediate and advanced topical knowledge. The technology section of the book is divided into chapters covering the basics of sensor integration in materials, the challenges associated with this approach, data processing, evaluation and validation, as well as methods for achieving an autonomous energy supply. The applications part then goes on to showcase typical scenarios where material-integrated intelligent systems are already in use, such as for structural health monitoring and smart textiles.
