Energy Savings Calculations for Commercial Building Energy Efficiency Upgrades Anthony J. Buonicore, 2024-07-02 Code compliant building materials and equipment will typically have a lower initial cost however the lifetime energy savings of the high efficiency equipment will often justify the upfront cost premium and result in a more cost effective solution Energy Savings Calculations for Commercial Building Energy Efficiency Upgrades assists energy professionals contractors building owners and managers in developing energy savings estimates that can facilitate a quick assessment of the potential energy savings that might be realized when replacing existing building components with the highest efficiency equipment It also provides algorithms to estimate greenhouse gas emission reductions that may be achieved by building energy efficiency upgrades and the impact these upgrades can have on building electrification decarbonization projects This book Focuses on the development of energy savings estimates based upon a whole building s energy consumption and the energy consumption associated with building end uses such as space heating space cooling ventilation lighting and so forth Includes over 70 illustrative examples using algorithms to demonstrate how energy savings and greenhouse gas emission reductions may be estimated utilizing different strategies and equipment

National Air Pollution Control Administration Publication ,196? **Building 2000** C. den Ouden, T.C. Steemers, 2012-12-06 This is the second volume of BUILDING 2000 a pilot project of the Commission s R D programme Solar Energy Applications to Buildings with the purpose of encouraging the adoption of solar architecture in large buildings In a first volume a similar series of studies is presented for the building categories SCHOOLS LABORATORIES and UNIVERSITIES and SPORTS AND EDUCATIONAL CENTRES In this second volume the results of the design studies illustrating passive solar architecture in buildings in the European Community are presented in particular for the building categories OFFICE BUILDINGS PUBLIC BUILDINGS and HOTELS AND HOLIDAY COMPLEXES There was an enthusiastic response from project teams responsible for the design of 32 large buildings with a total construction budget of more than 140 million ECU The willingness to improve their building concepts

by collaborating with R D experts was encouraging to the Commission's action in this field. These two books reflect the results of the exchange of information between the actual design practitioners and the European R D community. Within the BUILDING 2000 programme, Science and Technology at the Service of Architecture became reality. This was not only realised by the various support activities initiated by BUILDING 2000 but also by the active exchange of ideas by architects and design team members with R D workers during the various workshops held within the BUILDING 2000 programme. I highly recommend architects and engineers interested in passive solar architecture and modern day lighting approaches to study these final products of the BUILDING 2000 programme.
