Administrative Law Sabino Cassese, 2016-02-27 This Handbook explores the main themes and topics of the emerging field of Global Administrative Law with contributions by leading scholars and experts from universities and organizations around the world. The variety of the subjects addressed and the internationality of the Handbook's perspectives make for a truly global and multi-dimensional view of the field. The book first examines the growth of global administrations, their interactions within global networks, the emergence of a global administrative process and the development of the rule of law and democratic principles at a global level. It goes on to illustrate the relationship between global law and other legal orders with particular attention to regional systems and national orders. The final section devoted to the emergence of a global legal culture brings the book full circle by identifying the growth of a global epistemic community. The Research Handbook on Global Administrative Law provides a contemporary overview of the nascent field in detailed yet accessible terms, making it a valuable book for university courses. Academics and scholars with an interest in international law, administrative law, public law and comparative law will find value in this book as well as legal professionals involved with international and supranational organizations and national civil servants dealing with supranational organizations. [The Making of Irish Geology 1740-1940](#) Patrick N. Wyse Jackson, 2025-03-31 Ireland has long been the focus of research into its geological foundations and history. This book provides insights into the evolution of geological ideas in Ireland, gives assessments of underrepresented scientists and offers an appreciation of the value of geological collections for historical research. Through a series of twenty-two papers, this volume provides syntheses and analyses of aspects of this geological research and places the role of a number of individuals firmly within context. The topics discussed include the considerations of the nature of igneous rocks, aspects of geological mapping of the country, the role played by Irish scientists in determining the age of the Earth and the importance of early mineralogical and geological collectors and the role their collections made to advancing geological knowledge both in Ireland and Europe. [The Making of Irish Geology 1740-1940](#) will appeal to both the general and academic reader interested in the development of the geological sciences with a particular focus on Ireland. extraordinary connections between President Ronald Reagan's conversations with the American people and the profound changes that swept the nation under those conversations influence. Through the lens of history, rhetoric, and memory, Bates' work draws connections between the style, manner, and consistency of Reagan's oratory and the social and cultural settings in which it played so vital a role. Specifically focusing on the 1980 Neshoba County, Mississippi Campaign, visit, the popular culture memory of the Vietnam War, and the controversy of Iran Contra, this book illustrates Reagan's sweeping ability to change how Americans thought about themselves, their past, and their politics. By concluding with an examination of media coverage of Reagan's 2004 death, Bates reveals that certain interpretations Reagan rhetorically offered during his presidency had become an accepted collective memory for millions of Americans. In death as in life, Reagan had the last word. Through extensive archival research, the careful examination of well-known and obscure 1980s print media and popular culture, as well as new interviews, Bates challenges the prevailing Reagan historiography and provides a thoughtful reality check on some of the traditional views of his eight years in the Oval Office. *The Reagan Rhetoric* offers new and important contributions to Reagan studies that will appeal to scholars of the 40th president. This look at the 1980s will be of great interest to the growing number of historians studying that decade.
