Angels By The River A Memoir:

Angels by the River James Gustave Speth, 2014 Reflections on race environment politics and living on the front lines of change In *Angels by the River* James Gustave Gus Speth recounts his unlikely path from a southern boyhood through his years as one of the nation's most influential mainstream environmentalists and eventually to the system changing activism that shapes his current work Born and raised in an idyllic but racially divided town that later became the scene of South Carolina's horrific Orangeburg Massacre Speth explores how the civil rights movement and the South's agrarian roots shaped his later work in the heyday of the environmental movement when he founded two landmark environmental groups fought for the nation's toughest environmental laws spearheaded programs in the United Nations advised the White House and moved into a leading academic role as dean of Yale's prestigious School of Forestry and Environmental Studies Yet in the end he arrived somewhere quite unexpected still believing change is possible but not within the current political and economic system Throughout this compelling memoir Speth intertwines three stories his own his hometown's and his country's focusing mainly on his early years and the lessons he drew from them and his later years in which he comes full circle in applying those lessons In the process he invites others to join him politically at or near the place at which he has arrived wherever they may have started

The Social Profit Handbook David Grant, 2015-03-23 How do you measure the success of a social profit institution where missions are focused on the well being of people place and planet It is one of the most difficult tasks faced by non profit administrations who find themselves confused even paralyzed by the current demand for outcomes measurement a phrase used by most foundations and funding agencies and increasingly by individual donors The *Social Profit Handbook* gives those who lead govern and support social profit organizations both a different way to think about assessment and a very practical approach to implementing formative assessment practices practices whose purpose is not about judging work that has already happened but rather about improving work that will happen in the future Readers looking to improve planning and outcomes will find new insights and strategies from backward planning to applied rubrics These tools along with a host of case studies from around the nation make *The Social Profit Handbook* a unique organizational development tool for a wide range of social profit organizations as well as social venture businesses from low profit corporations to B Corps Drawing upon decades of leadership in the foundation and non profit worlds David Grant clarifies and emboldens the pursuit of social profit in multiple forms The result more benefits to society more social profit and stronger more effective social profit organizations

Beyond the New Deal Order Gary Gerstle, Nelson Lichtenstein, Alice O'Connor, 2019-12-27 Ever since introducing the concept in the late 1980s historians have been debating the origins nature scope and limitations of the New Deal order the combination of ideas electoral and governing strategies redistributive social policies and full employment economics that became the standard bearer for political liberalism in the wake of the Great Depression and commanded Democratic majorities for decades In the decline and break up of the New Deal coalition

What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes, 2015-04-03 Why does knowing more mean believing and doing less A prescription for change The more facts that pile up about global warming the greater the resistance to them grows making it harder to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead It is a catch 22 that starts says psychologist and economist Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples from the private sector to government agencies Stoknes shows how to retell the story of climate change and at the same time create positive meaningful actions that can be supported even by deniers In *What We Think About When We Try Not To Think About Global Warming* Stoknes not only masterfully identifies the five main psychological barriers to climate action but addresses them with five strategies for how to talk about global warming in a way that creates action and solutions not further inaction and despair These strategies work with rather than against human nature They are social positive and simple making climate friendly behaviors easy and convenient They are also story based to help add meaning and create community and include the use of signals or indicators to gauge feedback and be constantly responsive Whether you are working on the front lines of the climate issue immersed in the science trying to make policy or educate the public or just an average person trying to make sense of the cognitive dissonance or grapple with frustration over this looming issue *What We Think About When We Try Not To Think About Global Warming* moves beyond the psychological barriers that block progress and opens new doorways to social and personal transformation
