Pet Politics Susan Hunter,Richard A. Brisbin,2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society Pet Politics presents the first study of the development of companion

animal or pet law and policy in Canada and the United States by political scientists. The authors examine how people and governments classify three species of pets or companion animals: cats, dogs, and horses for various degrees of legal protection. They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty, kennel licensing, horse slaughter, feral and roaming cat, and breed ban policies. Finally, they examine the enforcement of these laws and policies by agencies and the courts. Using an eclectic mix of original empirical data, original case studies and interviews, and relying on general theories and research about the policy process and the sociopolitical function of legality, the authors illustrate that pet policy is a unique field of political struggle, a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals. The result of the political struggle, the authors argue, is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals.

Why Animal Suffering Matters Andrew Linzey, 2013-11-01

How we treat animals arouses strong emotions. Many people are repulsed by photographs of cruelty to animals and respond passionately to how we make animals suffer for food, commerce, and sport. But is this as some argue, a purely emotional issue? Are there really no rational grounds for opposing our current treatment of animals? In *Why Animal Suffering Matters*, Andrew Linzey argues that when analyzed impartially, the rational case for extending moral solicitude to all sentient beings is much stronger than many suppose. Indeed, Linzey shows that many of the justifications for inflicting animal suffering in fact provide grounds for protecting them. Because animals lack reason or souls or language, harming them is not an offense, Linzey suggests; that just the opposite is true: that the inability of animals to give or withhold consent, their inability to represent their interests, their moral innocence, and their relative defenselessness all compel us not to harm them. Andrew Linzey further shows that the arguments in favor of three controversial practices—hunting with dogs, fur farming, and commercial sealing—cannot withstand rational critique. He considers the economic, legal, and political issues surrounding each of these practices, appealing not to our emotions but to our reason, and shows that they are rationally unsupportable and morally repugnant. In this superbly argued and deeply engaging book, Linzey pioneers a new theory about why animal suffering matters, maintaining that sentient animals like infants and young children should be accorded a special moral status.
