Animal Welfare Richard P. Haynes,2008-07-27 Members of the animal welfare science community which includes both scientists and philosophers have illegitimately appropriated the concept of animal welfare by claiming to have given a scientific account of it that is more objectively valid than the more sentimental account given by animal liberationists This strategy has been used to argue for merely limited reform in the use of animals This strategy was initially employed as a way of sympathetically responding to the abolitionist claims of anti vivisectionists who objected to the use of animals in research It was subsequently used by farm animal scientists The primarily reformist as opposed to abolitionist goals of this community

make the false assumption that there are conditions under which animals may be raised and slaughtered for food or used as models in scientific research that are ethically acceptable The tendency of the animal welfare science community is to accept this assumption as their framework of inquiry and thus to discount certain practices as harmful to the interests of the animals that they affect For example animal welfare is conceptualized in such a way that death does not count as harmful to the interests of animal nor prolonged life a benefit
