Handbook of Digital Resources in Mathematics Education Birgit Pepin, Ghislaine Gueudet, Jeffrey Choppin, 2024-06-21
This handbook presents the state of the art scholarship on theoretical frames mathematical content learning environments pedagogic practices teacher professional learning and policy issues related to the development and use of digital resources in mathematics education With the advent of more and more open access digital resources teachers choose from the web what they see fit for their classroom students choose in the moment what they need for their projects and learning paths However educators and students often find it difficult to choose from the abundance of materials on offer as they are uncertain about their quality and beneficial use It is clear that at a time of bouleversement of the teaching learning processes it is crucial to understand the quality and the potentially transformative aspects of digital resources This book provides comprehensive analyses of and insights into the transformative aspects of digital resources

Advancing Online Teaching Kevin Kelly, Todd D. Zakrajsek, 2023-07-03 The goal of teaching online is fundamentally the same as teaching face to face facilitating the learning of all students to the greatest extent possible This book differs from other books on online teaching in that in the process of offering guidance on course design and planning developing outcomes and appropriate engaging activities managing the workload and assessment the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning By following those principles from the outset when planning a course all students will benefit and most particularly those whom the research shows have the greatest achievement gaps when taking online courses males first generation and low income students those from underrepresented minority groups the academically underprepared students with disabilities and those with limited online access or lacking readiness for online learning Beyond good planning and design Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities such as using culturally appropriate content and making it accessible in multiple formats They also share methods to foster faculty learner interaction and increase personal connections with students and among students through group activities or learning communities which are so critical to motivation and success Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and as importantly a wealth of proven ideas to help the new generation of students with diverse needs to succeed
