Uniform Trade List Circular Howard Challen, 1866 The Athenaeum, 1898 **The Book of Days** Robert Chambers, 1869 Discourse and Dominion in the Fourteenth Century Jesse M. Gellrich, 1995-03-06 This wide ranging study of language and cultural change in fourteenth century England argues that the influence of oral tradition is much more important to the advance of literacy than previously supposed In contrast to the view of orality and literacy as opposing forces the book maintains that the power of language consists in displacement the capacity of one channel of language to take the place of the other to make the source disappear into the copy Appreciating the interplay between oral and written

language makes possible for the first time a way of understanding the high literate achievements of this century in relation to momentous developments in social and political life Part I reassesses the nominalism of Ockham and the realism of Wyclif through discussions of their major treatises on language and government Part II argues that the chronicle histories of this century are tied specifically to oral customs and Part III shows how Sir Gawain and the Green Knight and Chaucer's Knight's Tale confront outright the displacement of language and dominion Informed by recent discussions in critical theory philosophy and anthropology the book offers a new synoptic view of fourteenth century culture As a critique of the social context of medieval literacy it speaks directly to postmodern debate about the politics of historicism today
