Architects against errors and omissions in the performance of their professional services and the review and development of the customary contractual arrangements defining the design professional's undertakings vis a vis his client the Owner the Project to be designed and the Contractor who was to implement that design At the outset the AIA's Owner Architect Agreement No B131 General Conditions No A201 and the Owner Contractor Agreements Nos A101 111 were the documents most frequently used by design professionals and these received particular attention In the early 1960s it became apparent that there was a need for a separate series of documents prepared to address these relationships when the Project to be designed involved primarily engineering considerations The number of Projects for which the Engineer was employed by the Owner as the prime professional to handle the Project design and construction administration was increasing
