**Recent developments with Airbus** Great Britain: Parliament: House of Commons: Trade and Industry Committee, 2007-07-25 The aircraft manufacturer Airbus was established in 1970 by the French German and UK governments with the Spanish government joining a year later in order to develop a coordinated and collaborative European response to the dominance of the global civil aviation market by American companies Since October 2006 following the decision by BAE Systems to sell its stake in the company Airbus has been wholly owned by EADS a joint venture between its French German and Spanish parent companies Recent Developments with Airbus HC 427 I examines recent challenges faced by Airbus including reduced competitiveness as a result of the weak US dollar delays and cost overruns in its flagship A380 aircraft its restructuring programme and the financing of the A350 XWB project It also looks at the future role for the UK Government and the Regional Development Agencies the implementation of the UK's National Aerospace Technology Strategy and the impact of the current World Trade Organization WTO dispute between the US and the European Union EU over government subsidies Given the fact that the sale of BAE's stake in the company has left the UK without a significant shareholding in *Scientific and Technical Aerospace Reports*, 1987 Aviation strategy Great Britain: Parliament: House of Commons: Transport Committee, 2013-06-03 Incorporating HC 765 i vii session 2012 13 Report published as Volume 1 ISBN 9780215057440 additional written evidence is contained in Volume 3 available on the Committee website at [www.parliament.uk/transcom](http://www.parliament.uk/transcom) **Department of Transportation and Related Agencies Appropriations for 2000** United States. House of Commons, 2005 Air Line Pilot, 1970 The efficiency programme Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2007-10-11 The Government's Efficiency Programme is designed to achieve ongoing efficiency gains across the public sector of 21.5 billion a year by 2007/08 to improve front line services to reduce Civil Service posts by more than 70 000 and to reallocate a further 13 500 posts to front line services Departments are responsible for delivering and quantifying the efficiencies achieved while the Office of Government Commerce OGC checks the robustness of figures put forward and provides support to help departments deliver their gains On 26 February the Committee took evidence on the 13.3 billion of annual efficiency gains departments had reported up to 30 September 2006 While some of these reported gains are robust almost 10 billion of reported efficiency gains remain uncertain On the basis of a Report by the Comptroller and Auditor General evidence was taken from OGC and the Treasury on four main issues the measurement of efficiency gains and headcount reductions the effects of efficiency projects on service quality the management of the Programme and embedding a culture of efficiency into the public sector **Proceedings of the Technology and the Mine Problem Symposium** Albert M. Hoerber, Gabriel Weber, Ignazio Cabras, 2022-02-27 The Routledge Handbook of European Integrations fills a significant gap in the European studies literature by providing crucial and groundbreaking coverage of several key areas that are usually neglected or excluded in European integration collections Whilst still examining the largest and most influential institutions bodies and highly funded policy areas as acknowledged dominant topics in European studies it crucially does so with much greater balance by devoting equal billing to areas such as culture in European integration or new technologies and their impact on the EU Organised around three main sections culture technology and tangibles the book offers an authoritative encyclopaedia to alternative areas in European integration from media football Erasmus and tourism to transport space AI and energy retains coverage of the dominant topics in European studies such as the Eurozone the Common Internal Market or European law but in balance with other areas of interest and provides an essential companion to existing scholarship in European studies The Routledge Handbook of European Integrations is essential reading and an authoritative reference for scholars students researchers and practitioners involved in and actively concerned about research in the study of European integration studies The Open Access version of Chapter 14 in this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**The Export Credits Guarantee Department and Sustainable Development** Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2008 Since last investigated in 2003 the Export Credits Guarantee Department has continued to make progress on sustainable development that deserves to be recognised Sound foundations have been laid and mechanisms put in place that offer a good framework for further action There is still room for improvement in the way sustainable development is incorporated into the agency's decision making and the ECGD must ensure its activities are in line with wider Government aspirations on sustainable development The challenge is for the ECGD to demonstrate that sustainable development is given appropriate weight within its current remit and that it does nothing that would actively undermine this principle In particular the ECGD should identify areas where its environmental standards could be tightened More rigorous standards can then be applied across its portfolio including to aerospace exports The ECGD must improve the transparency of its assessment processes and increase the level of disclosure of project information It is important that the department does more to attract renewable energy and other projects that support sustainable development support from Department for Business Enterprise and Regulatory Reform DBERR will be vital in taking this forward The ECGD's approach to sustainable development is all the more important because of its ability to influence and raise standards internationally A bolder approach from the ECGD on sustainable development issues and transparency will be vital in improving the performance of Export Credit Agencies in general

*Full speed ahead* Great Britain: Parliament: House of Commons: Business,

Innovation and Skills Committee, 2010-03-22 Motorsport and aerospace are two industries in which the United Kingdom is a world leader and the Committee believes that the future success of the UK economy will be based on these types of industries. Concerns regarding the aerospace included the current US complaint in the World Trade Organisation and the Government's right to support the industry through Repayable Launch Investment and that the UK aerospace sector has access to export trade credit at less favourable rates and through a more complex system than other countries. In examining the motorsport industry the Committee felt that there was a lack of understanding and effective engagement by Government. They are not content with the Government's current plans to take forward its work with the sector through the UK Automotive Council. Instead they recommend that the Government establish a dedicated motorsport policy team within the Department for Business, Innovation and Skills. Small and medium sized enterprises also play a very important role in supporting both sectors but they have been hit worst by the recession and the Government needs to do more to encourage high performance engineering firms to diversify. Both sectors require a highly skilled workforce and more needs to be done to align the education system with the skills needs of the industries. Finally is the problem of the non green image that both industries have.
