Food Wars Michael Heasman, Tim Lang, 2004-04-26 Food Wars is a heartening book which calls for a radical change in the way the world feeds itself It offers a blueprint for a future where nobody goes to bed hungry Derek Cooper founder presenter of the BBC's Food Programme An important book that should be read by everyone who cares about how the way food is produced affects our own health as well as that of the environment and our national economies Marion Nestle author of Food Politics and Paulette Goddard Professor of Nutrition Food Studies and Public Health New York University The emergence of global markets has a far reaching impact on what we eat and on health food security social justice and quality of life What matters now is not just what we eat but how and where it has been produced distributed and processed and the assumptions upon which this production is based a global politics of food and health Food Wars argues that two conflicting paradigms one developing food

through integrating the life sciences the other though ecology are battling to replace the dominant industrial productionist model of the 20th century both grappling to attract investment public support and policy legitimacy over the appropriate use of biology and food technologies Resilience and Food Security in a Food Systems Context Christophe Béné, Stephen Devereux, 2023-03-25 This open access book compiles a series of chapters written by internationally recognized experts known for their in depth but critical views on questions of resilience and food security The book assesses rigorously and critically the contribution of the concept of resilience in advancing our understanding and ability to design and implement development interventions in relation to food security and humanitarian crises For this the book departs from the narrow beaten tracks of agriculture and trade which have influenced the mainstream debate on food security for nearly 60 years and adopts instead a wider more holistic perspective framed around food systems The foundation for this new approach is the recognition that in the current post globalization era the food and nutritional security of the world s population no longer depends just on the performance of agriculture and policies on trade but rather on the capacity of the entire food system to produce process transport and distribute safe affordable and nutritious food for all in ways that remain environmentally sustainable In that context adopting a food system perspective provides a more appropriate frame as it incites to broaden the conventional thinking and to acknowledge the systemic nature of the different processes and actors involved This book is written for a large audience from academics to policymakers students to practitioners This is an open access book
