Brewing Local Stan Hieronymus, 2016-10-07 Beer has never been a stranger to North America Author Stan Hieronymus explains how before European colonization Native Americans were making beer from fermented corn such as the tiswin of the Apache and Pueblo tribes European colonists new to the continent were keen to use whatever local flavorings were at hand like senna celandine chicory pawpaw and persimmon Before barley took hold in the 1700s early fermentables included corn maize wheat bran and of course molasses Later immigrants to the young United States brought with them German and Czech yeasts and brewing techniques setting the stage for the ubiquitous Pilsner lagers that came to dominate by the late 1800s But local circumstances led to novel techniques like corn and rice adjuncts or the selection of lager yeasts that could ferment at ale like temperatures Despite the emergence of brewing giants with national distribution common brewers continued to make common beer for local taverns and pubs Distinctive American styles arose Pennsylvania Swankey Kentucky Common Choc beer Albany Ale and steam beer now called California common all distinctive styles born of their place From its post war fallow period the US brewing industry was reignited in the 1980s by the craft beer scene Follow Stan Hieronymus as he explores the wealth of ingredients available to the locavores and beer aficionados of today He takes the reader through grains hops trees plants roots mushrooms and chilis all ingredients that can be locally grown cultivated or foraged The author supplies tips on how to find these as well as dos and don'ts of foraging He investigates the nascent wild hops movement and initiatives like the Local Yeast Project Farm breweries are flourishing with more breweries operating on farms than the US had total breweries fewer than 50 years ago He gives recipes too each one showing how novel local
