 Form and Function was designed based on the fundamental goal for a student to foster understanding of algebraic structure
 that is an understanding of how the arrangements of symbols allows us to predict for example the behavior of a function or
 the number of solutions to an equation Mastering algebraic structure enables students to read algebraic expressions and
 equations in real life contexts not just manipulate them and to choose which form or which operation will best suit the
 context It facilitates being able to translate back and forth between symbolic graphical numerical and verbal representations

By balancing practice in manipulation and opportunities to see the big picture Algebra Form and Function offers a way for teachers to help students achieve real mastery of algebra
