two coherence theorems and May's strictification theorem of symmetric bimonoidal categories as well as their bimonoidal analogues This part includes detailed corrections to several inaccurate statements and proofs found in the literature Part 2 proves Baez's Conjecture on the existence of a bi initial object in a 2 category of symmetric bimonoidal categories The next main theorem states that a matrix construction involving the matrix product and the matrix tensor product sends a symmetric bimonoidal category with invertible distributivity morphisms to a symmetric monoidal bicategory with no strict structure morphisms in general
