EBOOK: College Algebra with Trigonometry Raymond Barnett, Michael Ziegler, Karl Byleen, David Sobecki, 2010-03-16
Barnett Ziegler Byleen and Sobecki's College Algebra with Trigonometry text is designed to be user friendly and to maximize student comprehension by emphasizing computational skills ideas and problem solving as opposed to mathematical theory. The large number of pedagogical devices employed in this text will guide a student through the course. Integrated throughout the text, students and instructors will find Explore Discuss boxes which encourage students to think critically about mathematical concepts. In each section, the worked examples are followed by matched problems that reinforce the concept being taught. In addition, the text contains an abundance of exercises and applications that will convince students that math is useful. A MathZone site featuring algorithmic exercises, videos, and other resources accompanies the text. Middle School Math Course 1 Se 1999c, 2000 A middle school math program consisting of three courses. Course 1 focuses on numerical reasoning, course two focuses on proportional reasoning, course 3 focuses on algebraic reasoning. Intermediate Algebra Jerome E. Kaufmann, Karen Schwitters, Karen L. Schwitters, 2000 Thousands of students have learned algebra with the Kaufmann Solution. This text is written for college students who need an algebra course that bridges the gap between elementary algebra and the more advanced courses in precalculus mathematics. The basic concepts of intermediate algebra are presented in a simple, straight-forward manner. Algebraic ideas are developed in a logical sequence through examples continuously reinforced through additional examples and then applied in a variety of problem-solving situations. In this edition, special efforts were made by the authors to incorporate improvements suggested by reviewers and by users to earlier editions while at the same time preserving the book's many successful features. College Algebra and Trigonometry with Graphing Technology David E. Stevens, 1996 This text adheres to recently suggested math guidelines with an emphasis on applications, technology, critical thinking, and group collaborative learning. Graphing technology is integrated throughout, but there is also an emphasis on algebraic understanding. Interactive pedagogy encourages active learning and builds student confidence. Applied problems from the fields of science, engineering, and business relate college algebra to real life.
