Digital Health Innovation for Consumers, Clinicians, Connectivity and Community A. Georgiou, L.K. Schaper, S. Whetton, 2016-08-25 In the last few decades health informaticians have established the knowledge base and practical expertise to facilitate the development of ever more capable technical systems, increased connectivity, expanded access and the greater mobility of e health and information management systems and we have witnessed the evolution from simple computer based records to systems allowing intra organisational, national and even international communication and information exchange. This book presents 20 of the papers delivered at the 24th Australian National Health Informatics Conference HIC 2016 held in Melbourne, Australia in July 2016. The primary theme of the 2016 conference is Digital Health Innovation for Consumers, Clinicians, Connectivity and Community. The papers included here reflect this theme and highlight the cutting edge research, evidence, technology updates and innovations that are fuelling the digital transformation of the healthcare sector. They cover a wide spectrum of fields and encompass major theoretical concepts, examples of key applications of new technologies and important new developments in the field of health informatics. The book provides a current overview of trends in health informatics and will be of interest to all those involved in the planning, design, implementation and delivery of healthcare today.

The Government and Copyright John S Gilchrist, 2015-09-01 The Government and Copyright: The Government as Proprietor, Preserver and User of Copyright Material Under the Copyright Act 1968 focuses on the interplay between law, policy and practice in copyright law by investigating the rights of the government as the copyright owner, the preserver of copyright material and the user of other's copyright material under the Copyright Act 1968. The first of two recurring themes in the book asks the question whether the needs and status of government should be different from private sector institutions which also obtain copyright protection under the law. The second theme aims to identify the relationship between government copyright law and policy, national cultural policy and fundamental governance values. As the first authoritative treatise on government copyright to be published in Australia, this book will be of immediate interest and relevance to Australian lawyers and policy makers, particularly in the light of ongoing efforts to ensure that the intellectual property system stimulates innovation and fosters trade and investment. Given that government copyright is recognised to some extent in most countries worldwide, this book is a valuable contribution to the international literature on this topic which remains sparse. Compensatory growth CG is defined as a change in growth rate usually positive following a period of reduced biomass or slowed growth due to some perturbation e g nutrient deprivation parasite load tissue damage or natural anthropogenic disturbance The phenomenon occurs throughout the plant and animal kingdoms and while it is primarily observed in species with short lifespans it has also been detected in longer living organisms such as trees CG occurs at the individual level as a variable life history trait but has the potential to impact the performance of whole populations and communities **Subject Guide to Books in Print** ,2001
