Mandatory Sustainability Requirements in EU Public Procurement Law Willem Janssen,Roberto Caranta,2023-10-05 This book provides the first comprehensive appraisal of the paradigm shift towards mandatory sustainability requirements in EU public procurement law Traditionally EU public procurement law focused on how to buy dictating procedural rules so that public buyers in the Member States did not discriminate against suppliers and service providers from other Member States Mandatory green and social requirements mean that with a view to achieving sustainable development goals and mitigating climate change the EU will limit this discretionary power for public buyers pushing them to acquire more sustainable goods and services Based on legal analysis informed by economic perspectives the book aims to contribute to an understanding and critical discussion of the EU legislator's move towards regulating what to buy The book discusses the role of the Public Procurement Directives in relation to this paradigm shift as well as various other sectoral legislative instruments that have been revamped or newly introduced in light of the European Green Deal The paradigm shift is analysed from different perspectives including subsidiarity alternative regulation economics and public purchasing The book includes novel sectoral

studies on transport food clothing and construction discussing how change is taking place and what its major challenges are for the future Chapters on Italy the Netherlands Spain and more offer case studies of Member States that have already introduced mandatory requirements and highlight lessons learnt This is an essential book for professionals working with public procurement law in academia and practice and to those engaged in achieving public policy objectives in light of climate change and social injustice

The Fall of the Wild Ben A. Minteer, 2018-12-11 The passenger pigeon the great auk the Tasmanian tiger the memory of these vanished species haunts the fight against extinction Seeking to save other creatures from their fate in an age of accelerating biodiversity loss wildlife advocates have become captivated by a narrative of heroic conservation efforts A range of technological and policy strategies from the traditional such as regulations and refuges to the novel the scientific wizardry of genetic engineering and synthetic biology seemingly promise solutions to the extinction crisis In *The Fall of the Wild* Ben A. Minteer calls for reflection on the ethical dilemmas of species loss and recovery in an increasingly human driven world He asks an unsettling but necessary question Might our well meaning efforts to save and restore wildlife pose a threat to the ideal of preserving a world that isn't completely under the human thumb

Minteer probes the tension between our impulse to do whatever it takes and the risk of pursuing strategies that undermine our broader commitment to the preservation of wildness. From collecting wildlife specimens for museums and the wilderness aspirations of zoos to visions of assisted colonization of new habitats and high tech attempts to revive long extinct species, he explores the scientific and ethical concerns vexing conservation today. *The Fall of the Wild* is a nuanced treatment of the deeper moral issues underpinning the quest to save species on the brink of extinction and an accessible intervention in debates over the principles and practice of nature conservation.
