

COLECCIÓN
EDUCACIÓN: OTROS LENGUAJES

«Nosotros nos oponemos firmemente a respaldar la condena a la escuela. Al contrario, abogamos por su absolución. Creemos que es precisamente hoy —en el momento en que muchos la condenan por inadaptada a la realidad moderna y otros incluso parecen querer abandonarla completamente— cuando aparece explícita y claramente lo que la escuela es y lo que hace. También confiamos en dejar claro que muchos de los abogados contra la escuela están motivados por un antiquísimo temor (e incluso por el odio) a una de sus características más radicales pero que la definen esencialmente: que la escuela ofrece “tiempo libre”, que transforma los conocimientos y destrezas en “bienes comunes” y, por lo tanto, que tiene el potencial para proporcionar a cada cual, independientemente de sus antecedentes, de su aptitud o de su talento natural, el tiempo y el espacio para abandonar su entorno conocido, para alzarse sobre sí mismo y para renovar el mundo (para cambiarlo de un modo impredecible).»

Michelle Perro, Vincanne Adams, 2017 Exploring the links between GM foods glyphosate and gut health With chronic disorders among American children reaching epidemic levels hundreds of thousands of parents are desperately seeking solutions to their children s declining health often with little medical guidance from the experts What s Making Our Children Sick convincingly explains how agrochemical industrial production and genetic modification of foods is a culprit in this epidemic Is it the only culprit No Most chronic health disorders have multiple causes and require careful disentanglement and complex treatments But what if toxicants in our foods are a major culprit one that if corrected could lead to tangible results and increased health Using patient accounts of their clinical experiences and new medical insights about pathogenesis of chronic pediatric disorders taking us into gut dysfunction and the microbiome as well as the politics of food science this book connects the dots to explain our kids ailing health What s Making Our Children Sick explores the frightening links between our efforts to create higher yield cost efficient foods and an explosion of childhood morbidity but it also offers hope and a path to effecting change The predicament we now face is simple Agroindustrial innovation in a previous era hoped to prevent the ecosystem disaster of DDT predicted in Rachel Carson s seminal book in 1962 Silent Spring However this industrial agriculture movement has created a worse disaster a toxic environment and consequently a toxic food supply Pesticide use is at an all time high despite the fact that biotechnologies aimed to reduce the need for them in the first place Today these chemicals find their way into our livestock and food crop industries and ultimately onto our plates Many of these pesticides are the modern day equivalent of DDT However scant research exists on the chemical soup of poisons that our children consume on a daily basis As our food supply environment reels under the pressures of industrialization via agrochemicals our kids have become the walking evidence of this failed experiment What s Making Our Children Sick exposes our current predicament and offers insight on the medical responses that are available both to heal our kids and to reverse the compromised health of our food supply
