

VACUUM HOSE DIAGRAM

Remove and Block Off ACM and EGR valves, with Block off plates.
You will want to remove the air pump early
There will also have to cap 2 nipples on the intake box.

Boost Controller

ACTUATOR (WASTEGATE CONTROL)

Replace All with 300 Ohm 1/2 watt resistors from Radio Shack.

Remove Double Throttle Actuator (Outside VSS) and Butterfly (Inside VSS) and plug the remaining holes. You may have to drill two screws on the Butterfly's out. Clean all passages.

Remove Turbo control actuator and flapper. Seal the hole that is left from removal of flapper assembly.

Remove Turbo Pin Control actuator assembly while flapper arms open.

Important notes when doing this mod:

- Port Wastegate to "L2H" and make sure it is coated with VSC flapper (highly recommended).
- Coverage and fit flaps call suggested.
- Cap Off any and all open nipples.
- Yes, all of the vacuum hoses really do go. If in doubt, take it out. This only applies to vacuum hoses/chambers of course.
- Then install all new lines (thick walled silicone) and route them as shown in this diagram.
- If you have trouble connecting the hard vacuum seal under URM, cut it out with Tin snips.
- Check and double-check all vacuum lines and connections.
- Remove Solenoids and replace with 300 ohm 1/2 watt resistors. Some will break, so if you are not sure if you need it or you may want to leave them for now. Tape all resistors in place with heat tape. (Radio Shack)
- The only solenoid that should stay for purge control.
- Be sure to hold flapper arms well. Do not just tack them, or they might cause problems later.
- Make sure the vacuum line going to the fpr is hooked up and leak free. Don't want a blown motor.
