Lineages of the Global City Shiben Banerji, 2025-07-08 The forgotten history of the occult foundations of the early twentieth century global city War revolution genocide rebellion slump The economic and political turmoil of the early twentieth century seemed destined to rip asunder the ties that bound colonizers and the colonized to one another The upheaval represented an opportunity and not just to nationalists who imagined new homelands or to socialists who dreamed of international brotherhood For modernists in the orbit of various occultisms the crisis of empire also represented an opportunity to reveal humanity's fundamental unity and common fate *Lineages of the Global City* recounts a continuous if also contentious transnational exchange among modernists and occultists across the Americas Europe South Asia and Australia between 1905 and 1949 At stake were the feelings and affect of a new global subject who would perceive themselves as belonging to humanity as a unified whole and the urban environment that would foster their subjectivity The interventions in this debate which drew in the period's most renowned modernists took the form of a succession of plans for cities suburbs and communes as well as experiments in building drawing printmaking filmmaking and writing Weaving together postcolonial feminist and Marxist insight on subject formation Shiben Banerji advances a new way of understanding modernist urban space as the design of subjective effects

The Emergence of Geophysics: A Journey into the Twentieth Century R.J. Howarth, 2024-12-02 How did geophysics begin Who were the pioneers of this new science What instruments did they devise to measure the Earth related phenomena they were interested in This Memoir attempts to answer such questions in a well illustrated and largely non technical account The seventeenth century saw magnetism used as an aid to prospecting for iron ore in Sweden and Isaac Newton's derivation of the law of gravitational attraction A gradually increasing interest in physics of the Earth brought forth the new discipline of geophysics in the early nineteenth century and by the end of the following century airborne and satellite based investigations had become routine The *Emergence of Geophysics* explores this evolution in several parallel strands terrestrial magnetism and electricity gravity seismicity heat geodynamics and radioactivity broadly reflecting the timing of their introduction as tools aiding geophysical studies Biographical information is included for many of its practitioners and the book should be of interest to both geophysicists and to anyone interested in the history of Earth science

Lesotho Clippings, 1987 **Mutual Fund Sourcebook**, 1990 *Interest Groups, Water Politics and Governance* Richard Meissner, 2015-07-08 The book investigates the role interest groups have played over the years to influence the governments of Lesotho and South Africa the World Bank and project implementation authorities in changing some policy aspects of the Lesotho Highlands Water Project LHWP Some of the issues being agitated by the interest groups are the resettlement of villagers where some of the dams for the projects are being constructed The author argues that interest groups and individuals have the ability to influence the above mentioned institutions and to such an extent that water politics and governance is not the domain of state institutions only
