INSTALLING

CAUTION

Do not over-tighten the ski lock nut or binding will seize.

2. Tighten the lock nut securely making sure the ski is free to pivot.

Ski Wear Bar

The ski wear bar is a replaceable bar attached to the underside of the ski. The purpose of the wear bar is to assist in turning the snowmobile, to minimize ski wear, and to minimize good steering control. If the snowmobile is operated primarily in deep snow, the wear bar wear will be minimal; however, if the snowmobile is operated in terrain where the snow cover is minimal, the ski wear bar will wear faster. Arctic Cat recommends that the ski wear bar be checked once a week and replaced if worn to 1/2 of original thickness.

REMOVING

1. Remove one end screw holding from the ski.
2. With the gas tank nearly empty (less than 1/4 full) for the snowmobile on its side.

CAUTION

A piece of cardboard should be used to protect the front on the hood.

3. Remove the lock nut and washers securing the wear bar to the ski. Account for any spacers.

4. Pry the rear of the wear bar down until the wear bar ends are clear of the ski; then slide the wear bar forward until the front of the wear bar is free from the ski.

5. Remove the wear bar.

Rib Fracture Management Marc de Moya, John Mayberry, 2018-09-03 In recent years the approach towards rib fractures has evolved. Abandoned in the past due to inadequate instrumentation and lack of evidence, rib fixation has recently re-emerged as a treatment option for trauma patients. There have been a number of advances over the last 25 years that now allow surgeons to internally fix rib fractures that otherwise may have not had other options. However, as a result, there has been a rapid increase in literature and many institutions interested in initiating rib fixation programs. Due to a variety of practitioners involved, namely trauma surgeons, orthopedic surgeons, and thoracic surgeons, there has been no comprehensive guide to patient selection, technique, and post-operative care. The purpose of this text is to fill the educational gap for those trauma, orthopedic, and thoracic surgeons interested in learning the cutting edge, evidence-based approaches to treatment of rib fractures. This topic has caught the interest of many and has been a recurrent theme at surgical meetings over the last two years. Although there has been ever-increasing levels of interest and experience nationally, there are many questions which remain. This text will provide not only the theoretical background for improving outcomes in those with rib fractures but also serve as a practical guide to those interested in starting new programs. The text will include tips and tricks that can be used in the OR or at the bedside to improve patient care. Therefore, the focus will be on a comprehensive review but also including tips and tricks from the most experienced surgeons around the country who are performing internal fixation for rib fractures.
