Understanding Terrorism Innovation and Learning Magnus Ranstorp, Magnus Normark, 2015-04-24 This book examines the role of terrorist innovation and learning in theory and practice and in the context of three specific EU case studies It is often said that terrorist groups are relatively conservative in character operating in a technological vacuum relying almost exclusively on bombs and bullets This observation masks increasing complexity and creativity and innovation within terrorist groups and one of the most distinguishing features of al Qaeda s terrorist operations is its propensity for remarkable innovation This book examines how and why terrorist groups innovate more generally and al Qaeda related terrorist plots in Europe more specifically The starting point for this book was twofold Firstly to examine the issue of innovation and learning more generically both in theory within specific themes and within the context of al Qaeda s influence on this process Secondly this book examines the evolution of specific al Qaeda related plots in three specific northern EU

states the United Kingdom Denmark and Germany where there has been a significant volume of planned failed and executed terrorist plots In particular these case studies explore signs of innovation and learning This book will be of much interest to students of terrorism and counter terrorism political violence security studies and IR in general
