India and Network-Centric Warfare Kartik Bommakanti, 2025-11-14 This book analyses India's Network Centric Warfare (NCW) capabilities and how well they are integrated into the Indian armed forces especially the Indian Army. It explores primarily the technological and to a more limited extent the doctrinal and organisational issues that are related to NCW. It assesses how three technologies that are central to NCW: cyber, electronic warfare and space are being developed and integrated by the Indian armed services. In addition, it also analyses partially how the Indian armed services acquire and integrate Artificial Intelligence and Quantum Technology in specific areas and also explores the need for the Indian armed services to acquire Kinetic Energy Weapons (KEWs) and Directed Energy Weapons (DEWs) especially microwave and laser weapons. A part of the International Politics in the Age of Disruption series, the book will be indispensable for students and researchers of military studies, security studies, cyber warfare, political studies, international relations, security studies and South Asian studies. *Proceedings of the 15th International Marine Design Conference* Austin A. Kana, 2024-08-22 The 15th International Marine Design Conference (IMDC) 2024 was organized by the Department of Maritime and Transport Technology, Delft University of Technology and was hosted by the Netherlands Defence Materiel Organisation at the Marine Etablissement Amsterdam MEA. The aim of the IMDC is to promote all aspects of marine design as an engineering discipline. The focus of IMDC 2024 is on the key design challenges and opportunities in the maritime field with special emphasis on the following themes: Ship design methodology issues such as design spiral, systems engineering, set-based design, design optimisation, concurrent design, modular design, configuration-based design or fuzzy design aspects. Novel marine design concepts such as hull form design, transport ships, service vessels, naval vessels, yachts and cruise ships or specialized and complex vessels. Offshore design methodology such as applications to offshore wind turbines, semi-submersibles, floating fish farms or floating cities. Influence of energy transition on maritime design including both zero emission and high power and energy systems. Influence of unmanned and autonomous transition on maritime design. Influence of digital transition on maritime design such as digital shadows and twins, model-based systems engineering, AI, ML and big data. Influence of regulations on maritime design. Maritime design education. *Federal Register*, 2014 Regulations Governing the Employment of Civil Personnel Under the Naval Service United States Civil Service Commission, 1930 Hearing on National Defense Authorization Act for Fiscal Year 2015 and Oversight of Previously Authorized Programs Before the Committee on Armed Services, House of Representatives, One Hundred Thirteenth Congress, Second Session United States. Congress. House. Committee on Armed Services. Tactical Air and Land Forces Subcommittee, 2014 Nanoweapons Louis A. Del Monte, 2017 Nanoweapons just might render humanity extinct in the near future, a notion that is frightening and

shocking but potentially true In Nanoweapons Louis A Del Monte describes the most deadly generation of military weapons the world has ever encountered With dimensions one thousandth the diameter of a single strand of human hair this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever In his insightful and prescient account of this risky and radical technology Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty first century He traces the emergence of nanotechnology discusses the current development of nanoweapons such as the mini nuke which weighs five pounds and carries the power of one hundred tons of TNT and offers concrete recommendations founded in historical precedent for controlling their proliferation and avoiding human annihilation Most critically Nanoweapons addresses the question Will it be possible to develop deploy and use nanoweapons in warfare without rendering humanity extinct

Committee on Armed Services,2016 *Sustainable Regeneration of Former Military Sites* Samer Bagaeen,Celia Clark,2016-06-10 Sustainable Regeneration of Former Military Sites is the first book to analyze a profound land use change happening all over the world the search for sustainable futures for property formerly dedicated to national defense now becoming redundant disposed of and redeveloped The new military necessity for rapid flexible response requires quite different physical resources from the massive fixed positions of the Cold War with huge tracts of land and buildings looking for new uses The transition from military to civilian life for these complex contaminated isolated heritage laden and often contested sites in locations ranging from urban to remote is far from easy There is very little systematic analysis of what follows base closures leaving communities governments developers and planners experimenting with untested land use configurations partnership structures and financing strategies With twelve case studies drawn from different countries many written by those involved Sustainable Regeneration of Former Military Sites enables the diverse stakeholders in these projects to discover unique opportunities for reuse and learn from others experiences of successful regeneration
