Emerging Dynamics in the Provision of Private Higher Education in Africa Wondwosen Tamrat, Damtew Teferra, 2024-05-29 This edited book examines the private higher education PHE sector in African countries. Reports suggest that private institutions across the continent outnumber their public counterparts yet there has been little scholarly investigation into this emerging phenomenon. The book therefore seeks to document and analyse key trends and contemporary themes in the PHE sector as well as chart historical developments, policy and regulatory frameworks. As a whole, it provides the reader with in-depth knowledge, rich perspectives and robust analyses from leading authorities in the field. Contributions from all sub-regions combine thematic issues with shaping discourse on the topic and the discussions are undertaken in the context of global perspectives. The book will be of interest to academics, researchers, postgraduate students, policy makers, analysts and development partners interested in African higher education and PHE in particular. in Out-of-Home Care Patricia McNamara, Carme Montserrat, Sarah Wise, 2019-11-08 This book draws together for the first time some of the most important international policy practice and research relating to education in out-of-home care. It addresses the knowledge gap around how good learning experiences can enrich and add enjoyment to the lives of children and young people as they grow and develop. Through its ecological development lens, it focuses sharply on the experience of learning from early childhood to tertiary education. It offers empirical insights and best practices examples of learning and caregiving contexts with children and young people in formal learning settings at home and in the community. This book is highly relevant for education and training programs in pedagogy, psychology, social work, youth work, residential care, foster care and kinship care along with early childhood, primary, secondary and tertiary education courses. **Annual Report to the National Assembly for the Financial Year Ended ...** South Africa. Social Justice Alistair Ross, 2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education. We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good. Using a social constructivist approach, the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers. We discuss how many

terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good

The Rise of the Radical Right in the Global South Rosana Pinheiro-Machado, Tatiana Vargas-Maia, 2023-05-31 The Rise of the Radical Right in the Global South is the first academic study adopting an interdisciplinary and international perspective to offer a comprehensive and groundbreaking framework for understanding the emergence and consolidation of different radical right movements in Global South countries in the twenty first century From deforestation and the anti vaccine movement in Bolsonaro's Brazil to the massacre of religious minorities in Modi's India the rise of the radical right in the Global South is in the news every day Not long ago some of these countries were globally celebrated as emerging economies that consolidated vibrant democracies Nonetheless they never overcame structural problems including economic inequality social violence cultural conservatism and political authoritarianism Featuring case studies from Brazil India the Philippines and South Africa and more generally from Africa and Latin America this book analyses future scenarios and current alternatives to this political movement to the radical right It proposes a shift of focus in examining such a trend adopting a view from the Global South conventional theoretical tools developed around the experience in Global North countries are not enough The authors show that the radical right in the Global South should be analysed through specific lenses considering national historical patterns of political and economic development and instability They also warn that researching these countries may differ from contexts where democratic institutions are more reliable This does not mean abandoning a transnational understanding of the radical right rather it calls for the opposite the chapters examine how the radical right is invented adapted modified and resisted in specific regions of the globe This volume will be of interest to all those researching the radical right and the politics of development and the Global South

Medicinal Effects of Agathosma (Buchu) Extracts Barbara Huisamen, Patrick J.D. Bouic, Carmen Pfeiffer, Mignon van Vuuren, 2019-12-12 The research results presented in this book span the quest of Cape Kingdom Nutraceuticals Prof Patrick Bouic and Prof Barbara Huisamen to scientifically validate the health promoting properties of an aqueous extract of the plant Agathosma To accomplish this they made use of both in vitro and in vivo models to understand and underscore the anecdotal information of the benefits of this product Cell based studies

highlighted anti inflammatory and anti diabetic effects while animal based studies were utilized to confirm the anti diabetic effects whilst further elaborating on anti obesity properties In addition technology aimed at small animals were used to follow blood pressure to demonstrate anti hypertensive effects while ex vivo perfused hearts were studied to show that this extract also protected the heart against an ischaemic incident In view of the current pandemic of obesity and non communicable diseases the research results presented in this book will be of special interest to the scientific community and health practitioners interested in cardiometabolic diseases and nutraceuticals as an alternative treatment option In view of the failure of many pharmaceuticals to curb non communicable diseases these results are deemed of high importance
