2016 Military Application Forms In Samhs:

South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Contemporary Issues in South African Military Psychology Nicole Dodd, Petrus C. Bester, Justin van der Merwe, 2020-05-13 *Contemporary Issues in South African Military Psychology* is a well-timed, extremely thought-provoking, imperative particular to the African context and deals with a highly contemporary issue within the people management and the management studies fields, specifically in the military field and context. This is specifically of importance as military psychology is a behavioural science that combines theory and practical application. Prof Karel Stanz, University of Pretoria.

The Origin and Growth of Geography as a discipline at South African Universities Gustav Visser, 2016-09-20 The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad and textured review of South Africa's geography departments, their staff members, their times and the different geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future.

Defence Diplomacy and National Security Strategy Ian Liebenberg, Dirk Kruijt, Shrikant Paranjpe, 2020-04-20 The post-cold war era presented security challenges that at one level are a continuation of the cold war era; at another level, these phenomena manifested in new forms. Whether the issues of economics and trade, transfer of technologies, challenges of intervention or humanitarian crisis, the countries of the South, previously pejoratively labelled Third World or developing countries, have continued to address these challenges within the framework of their capabilities and concerns. The volume explores defence diplomacies, national security challenges and strategies, dynamics of diplomatic manoeuvres and strategic resource management of Latin American, southern African and Asian countries.

Annual Report South Africa. Department of Defence, 2016 The Oxford

It provides insights from non state actors such as informal cross border traders ICBTs informal cross border transporters undocumented migrants and cross border communities It argues that security needs to be understood beyond a state centric paradigm by focusing on the political economic environmental and societal threats at macro meso and micro levels The book suggests that at the core of cross border security challenges in the Southern African region is a post colonial governmentality This drives the nationalisation of cross border security as though it is the only security leading to nation states in turn depoliticising and invisibilising the security and livelihoods of ordinary people even when nation states claim to be protecting the same The book will be a useful resource for students scholars and researchers of African Studies Border Studies Human Geography Migration Studies Development Studies International Studies International Relations Political Science and Security Studies
