Education is changing rapidly just as the social forces outside of schools are and to present the material in a meaningful way the authors of this book provide a unifying framework an open systems approach to illustrate how the issues and structures we find in education are all interconnected. Separate chapters are devoted to how schools help shape who has access to educational opportunities and who does not issues of race class and gender the organization of schools and the roles that make up educational settings and more. Throughout the book readers will have an opportunity to engage with theories and issues that are discussed and to apply their newly obtained understanding in response to emerging and persistent problems in the educational system. The new edition continues to be a critical point of reference for students interested in exploring the social context of education and the role education has in shaping our society. It is perfect for sociology of education and social foundations of education courses at the undergraduate or early graduate level.
