Analysis Of Shona Set S

Brian Raftopoulos, Alois Mlambo

Analysis Of Shona Set S:

Vowel Epenthesis in Loanword Adaptation Christian Uffmann, 2012-02-14 While it is commonly assumed that languages epenthesize context free default vowels this book shows that in loanword adaptation several strategies are found which interact intricately Large loanword corpora in Shona Sranan Samoan and Kinyarwanda are analyzed statistically and the patterns are modeled in a version of Optimality Theory which introduces constraints on autosegmental representations The focus of this book is on English loans in Shona providing an in depth empirical and formal analysis of epenthesis in this language The analysis of additional languages allows for solid typological generalizations In addition a diachronic study of epenthesis in Sranan provides insight into how insertion patterns develop historically In all languages analyzed default epenthesis exists alongside vowel harmony and spreading from adjacent consonants While different languages prefer different strategies these strategies are subject to the same set of constraints however In spreading feature markedness plays an important role alongside sonority We suggest universal markedness scales which combine with constraints on autosegmental configurations to model the patterns found in individual languages and at the same time to constrain the range of possible crosslinguistic variation *Languages and Education in Africa* Birgit Brock-Utne, Ingse

Skattum, 2009-05-11 The theme of this book cuts across disciplines Contributors to this volume are specialized in education and especially classroom research as well as in linguistics most being transdisciplinary themselves Around 65 sub Saharan languages figure in this volume as research objects as means of instruction in connection with teacher training language policy lexical development harmonization efforts information technology oral literature and deaf communities The co existence of these African languages with English French and Arabic is examined as well This wide range of languages and subjects builds on recent field work giving new empirical evidence from 17 countries Botswana Ethiopia Ghana Kenya Madagascar Malawi Mali Mozambique Niger Nigeria Senegal South Africa Swaziland Tanzania Uganda Zambia and Zimbabwe as well as to transnational matters like the harmonization of African transborder languages As the Editors a Norwegian social scientist and a Norwegian linguist both working in Africa have wanted to give room for African voices the majority of contributions to this volume come from Africa *Language Death* Matthias Brenzinger, 2012-10-25

CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students researchers and practitioners in all of the social and language related sciences carefully selected book length publications dealing with sociolinguistic theory methods findings and applications It approaches the study of language in society in its broadest sense as a truly international and interdisciplinary field in which various approaches theoretical and empirical supplement and complement each other The series invites the attention of linguists language teachers of all interests sociologists political scientists anthropologists historians etc to the development of the sociology of language *Gendered Spaces, Religion and Migration in Zimbabwe* Ezra Chitando, Sophia Chirongoma, Molly Manyonganise, 2022-10-12 This book explores the intersections of gender religion

and migration within the context of post independent Zimbabwe with a specific focus on how gender disparities impact economic development By demonstrating how these interconnections impact women s and girls lived realities the book addresses the need for gender equity gender inclusion and gender mainstreaming in both religious and societal institutions This book assesses the gender and migration nexus in Zimbabwe and examines the impact of religio cultural ideologies on the status of women In doing so it assesses the transition of Zimbabwean women across spaces and provides insights into the practical strategies that can be utilised to improve their status both at home and on the move Furthermore chapters show how space continues to be genderised in ways that perpetuate structural inequality to challenge the exclusion of women from key social processes Contributing to ongoing scholarly debates on gender in Africa this book will be of interest to academics and students of Gender Studies Women s Studies African Studies Development Studies as well as advocates of human rights and gender activists

Becoming Zimbabwe. A History from the Pre-colonial Period to 2008 Brian Raftopoulos,Alois Mlambo,2009-09-15 Becoming Zimbabwe is the first comprehensive history of Zimbabwe spanning the years from 850 to 2008 In 1997 the then Secretary General of the Zimbabwe Congress of Trade Unions Morgan Tsvangirai expressed the need for a more open and critical

process of writing history in Zimbabwe The history of a nation in the making should not be reduced to a selective heroic tradition but should be a tolerant and continuing process of questioning and re examination Becoming Zimbabwe tracks the idea of national belonging and citizenship and explores the nature of state rule the changing contours of the political economy and the regional and international dimensions of the country s history In their Introduction Brian Raftopoulos and Alois Mlambo enlarge on these themes and Gerald Mazarire s opening chapter sets the pre colonial background Sabelo Ndlovu tracks the history up to WW11 and Alois Mlambo reviews developments in the settler economy and the emergence of nationalism leading to UDI in 1965 The politics and economics of the UDI period and the subsequent war of liberation are covered by Joesph Mtisi Munyaradzi Nyakudya and Teresa Barnes After independence in 1980 Zimbabwe enjoyed a period of buoyancy and hope James Muzondidya s chapter details the transition from buoyancy to crisis and Brian Raftopoulos concludes the book with an analysis of the decade long crisis and the global political agreement which followed

Gender and Noun Classification Eric Mathieu, Myriam Dali, Gita Zareikar, 2019 This volume explores the many ways by which natural languages categorize nouns into genders or classes The findings in the volume have significant implications for syntactic theory and theories of interpretation and contribute to a greater understanding of the interplay between inflection and derivation

Religion and COVID-19 Vaccination in Zimbabwe Tenson Muyambo, Fortune Sibanda, Ezra Chitando, 2023-10-17 This book analyses the role of religion during the COVID 19 pandemic and vaccination rollout in Zimbabwe Zimbabwe was listed by the World Health Organization WHO as one of thirteen African countries to have fully vaccinated more than 10% of its population against COVID 19 by the end of September 2021 but the country fell far short of the government s own target for achieving 60% inoculation by December 2020 This book analyses whether religion played a role in explaining why the government s pro vaccine stance did not translate into high vaccination rates Drawing upon various religions including African indigenous religions Christianity and Islam the book considers how faith actors demonstrated vaccine acceptance resistance or hesitancy Zimbabwe offers a particularly interesting and varied case for analysis and the original research on display here will be an important contribution to wider debates on religion and COVID 19 This book will be useful to academics researchers and students studying religious studies sociology health and well being religion and development

Towards an African-Christian Environmental Ethic Nisbert Taisekwa Taringa, 2014-04-17 This book is a critical comparative study of African Shona and Christian attitudes to nature The purpose of initiating this discussion is to review the existing attitudes to nature in these two religions This has important implications in an attempt to formulate a public environmental ethic in which traditional Shona and Christian adherents participate This is crucial in the light of the ongoing inequity and ecological imbalance in Zimbabwe

The Five-Factor Model of Personality Across Cultures Robert R. McCrae, Juri Allik, 2012-12-06 ROBERT R MCCRAE it is simply personality research conducted in different countries The implicit assumption behind this practice is that personality processes are universal and where they

are studied is thus of no consequence An insensitivity to cultural context once imputed mostly to Americans now appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature *The International Journal of African Historical Studies* ,1981 **Duelling Languages** Carol Myers-Scotton,1997 The author describes and explains intrasentential codeswitching the production of two or more languages within the same sentence **Contemporary Development Ethics from an African Perspective** Beatrice Okyere-Manu,Stephen Nkansah Morgan,Ovett Nwosimiri,2023-07-29 This book offers fresh academic insights reflections questions issues and approaches to development ethics taking into account African values and ethics Development ethics is an area of applied ethics that examines the moral issues involved in global social and economic transformation While it is a relatively new discipline there have been numerous scholarly publications on it from Western perspectives However only a few studies that focused on development ethics from the African perspective To address this gap the book seeks to answer critical questions such as What does development mean to Africans How can we measure development Who gets to decide and What constitutes just development in Africa With contributions from African scholars from diverse backgrounds the book covers various development themes such as Theories and approaches to development ethics in Africa Environmental Ethics and African Development Ethics Politics and African Development Migration and African development Gender Ethics and Socio economic Development in Africa Education Ethics and African development It is an essential resource for researchers lecturers and students interested in political philosophy and African culture studies The Book Review Digest ,2007 Positional Faithfulness Jill N. Beckman,2013-04-11 First published in 1999 This study developed from a dissertation in 1993 when the author undertook what she thought would be a simple Optimality Theory analysis of Shona vowel harmony Having initially treated Shona height harmony as a case of featural alignment akin to Kirchner s 1993 analysis of Turkish she realized that alignment constraints alone could not account for one central aspect of the Shona case the priority of initial syllable features in determining the outcome of harmony This volume of research outlines the authors discoveries **Risk, Resettlement and Relations** Marleen Dekker,2004 *Zambezia* ,2000 **Dictionary Catalog of the Schomburg Collection of Negro Literature & History** Schomburg Collection of Negro Literature and History,1962 **Maintaining Momentum to 2015?** ,2005-01-01 This report addresses the issue of what publicly supported programs and external assistance from the Bank and other agencies can do to accelerate attainment of targets such as reducing infant mortality by two thirds The evidence presented here

relates to Bangladesh a country which has made spectacular progress but needs to maintain momentum in order to achieve its own poverty reduction goals The report addresses the following issues 1 What has happened to child health and nutrition outcomes and fertility in Bangladesh since 1990 Are the poor sharing in the progress which is being made *The 1840 translation of the Gospel of Luke as a technology of power* Itumeleng D. Mothoagae ,2024-07-26 In this book the author aims to explore the impact of 19th century translations of the Bible into indigenous languages with a specific focus on the Setswana translation The translations have had a profound effect on the religio cultural practices of the indigenous people leading to erosion and alteration of their traditions and identities I argue that it is crucial to consider the translator s intentions and the associated literature such as journals and letters to understand the translation process comprehensively The Setswana Bible was the first to be translated in Africa and tracing the intentions of Robert Moffat the first translator is imperative to understanding the impact of the translation on the receptor culture The methodology adopted is interdisciplinary drawing from linguistics African languages history English literature cultural studies black studies and theology I analyse the impact of the 1840 Gospel of Luke in the context of Setswana culture in South Africa and my findings demonstrate that translations cannot be distinct from the translator To gain a deep understanding of the implications of such texts I adopt a methodology that analyses significant historical literature and primary sources including the records and works of The British and Foreign Bible Society The History of the London Missionary Society and the journals letters and writings of missionaries such as Robert Moffat and John Campbell
