Sommese, Charles Weldon Wampler (II.), 2005 Written by the founders of the new and expanding field of numerical algebraic geometry this is the first book that uses an algebraic geometric approach to the numerical solution of polynomial systems and also the first one to treat numerical methods for finding positive dimensional solution sets The text covers the full theory from methods developed for isolated solutions in the 1980 s to the most recent research on positive dimensional sets

Harmonic Analysis and Convexity Alexander Koldobsky, Alexander Volberg, 2023-07-24 In recent years the interaction between harmonic analysis and convex geometry has increased which has resulted in solutions to several long standing problems This collection is based on the topics discussed during the Research Semester on Harmonic Analysis and Convexity at the Institute for Computational and Experimental Research in Mathematics in Providence RI in Fall 2022 The volume brings together experts working in related fields to report on the status of major problems in the area including the isomorphic Busemann Petty and slicing problems for arbitrary measures extremal problems for Fourier extension and extremal problems for classical singular integrals of martingale type among others Exercises in Analytical Geometry J. problems and several complex variables He was among the first to study variational inequalities In much of his work his underlying philosophy was that simple tools of function theory could help one understand the essential concepts embedded in an issue although at a cost in generality This approach was extremely successful In this two volume work most all of Lewy s papers are presented in chronological order They are preceded by several short essays about Lewy himself prepared by Helen Lewy Constance Reid and David Kinderlehrer and commentaries on his work by Erhard Heinz Peter Lax Jean Leray Richard MacCamy Fran ois Trèves and Louis Nirenberg Additionally there are Lewy s own remarks on the occasion of his honorary degree from the University of Bonn
