Text Analysis Pipelines Henning Wachsmuth, 2015-12-02 This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run time efficiency

and that robustly mine relevant information from text of any kind Based on state of the art techniques from machine learning and other areas of artificial intelligence novel pipeline construction and execution algorithms are developed and implemented in prototypical software Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad hoc use of text mining in web search and big data analytics Both web search and big data analytics aim to fulfill peoples needs for information in an adhoc manner The information sought for is often hidden in large amounts of natural language text Instead of simply returning links to potentially relevant texts leading search and analytics engines have started to directly mine relevant information from the texts To this end they execute text analysis pipelines that may consist of several complex information extraction and text classification stages Due to practical requirements of efficiency and robustness however the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple manually constructed pipelines *Handbook of e-Tourism* Zheng

At Risk of Deprivation Jonas Bergmann,2023-10-19 This open access book examines how and why various forms of climate im mobilities can impact people s objective and subjective well being Worsening climate impacts are forcing subsistence farmers worldwide to decide between staying or leaving their homes This mixed methods study analyzes cases of climate related migration displacement relocation and immobility in Peru s coastal highland and rainforest regions The results reveal that numerous farmers experienced profound and often negative well being impacts regardless of whether they stayed or migrated The higher the structural constraints such as weak governance and the more damaging the climate

impacts were the higher the risk of well being declines Additionally the affected individuals often had limited agency and ability to mitigate losses These findings challenge the notion of migration as adaptation and emphasize the importance of safeguarding the human rights and security of those affected while addressing loss and damage Without significant investments in such efforts climate impacts could sharply diminish the well being of numerous subsistence farmers worldwide irrespective of whether they stay or migrate
