Bohensky,2004-02-29 The Bohensky Dissection Series has been used successfully by more than 300 000 biology students nationwide Each book in the series is designed to guide the student through the study of anatomical structures The books do this through the use of clearly marked photographs and illustrations Accompanying text offers the student both easy to follow dissection instructions and factual information about the section under observation At the end of each chapter there are tests which can be used for self study or for grade course evaluation Within the traditional dissection portion of a biology course many programs include the sheep heart eye and brain Within many of these guides the author has incorporated photographs of these structures to more closely follow standard course curriculum The author also provides important information on human organs such as the eye ear and heart In this way the student can better understand the role and function of these organs as they relate to human life processes Add to this each book s large size format lay flat spiral binding and reasonable cost and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country s schools Supplement to the Anatomy of the Mammalia George Herbert Morrell,1872
