

THE SKELETON
The skeleton is the framework of the body, supporting the soft organs and tissues. It is composed of bones and cartilage. The bones are made of a hard, white, mineralized tissue called bone. The cartilage is a soft, white, fibrous tissue. The skeleton is divided into the axial skeleton (skull, spine, rib cage) and the appendicular skeleton (arms and legs).

THE MUSCLES
The muscles are the soft tissue that contracts to move the bones. They are made of muscle fibers. The muscles are divided into the skeletal muscles (attached to bones) and the smooth muscles (not attached to bones).

THE NERVOUS SYSTEM
The nervous system is the control system of the body. It is composed of the brain, spinal cord, and nerves. The brain is the center of the nervous system. The spinal cord is the main pathway for information between the brain and the rest of the body. The nerves are the branches of the spinal cord that carry information to and from the rest of the body.

THE Joints
The joints are the points where two or more bones meet. They allow the bones to move relative to each other. There are three main types of joints: ball-and-socket joints, hinge joints, and sliding joints.

THE SKELETON AND MUSCLES
The skeleton and muscles work together to move the body. The bones provide the framework, and the muscles provide the force to move the bones. The nervous system controls the muscles.

THE MUSCLES
The muscles are the soft tissue that contracts to move the bones. They are made of muscle fibers. The muscles are divided into the skeletal muscles (attached to bones) and the smooth muscles (not attached to bones).

THE NERVOUS SYSTEM
The nervous system is the control system of the body. It is composed of the brain, spinal cord, and nerves. The brain is the center of the nervous system. The spinal cord is the main pathway for information between the brain and the rest of the body. The nerves are the branches of the spinal cord that carry information to and from the rest of the body.

THE MUSCLES
The muscles are the soft tissue that contracts to move the bones. They are made of muscle fibers. The muscles are divided into the skeletal muscles (attached to bones) and the smooth muscles (not attached to bones).

THE NERVOUS SYSTEM
The nervous system is the control system of the body. It is composed of the brain, spinal cord, and nerves. The brain is the center of the nervous system. The spinal cord is the main pathway for information between the brain and the rest of the body. The nerves are the branches of the spinal cord that carry information to and from the rest of the body.
